

Make your guests feel like home

Connectivity and leisure solutions for guests staying at digital hotels.

At Televes, we are experts in developing and implementing audiovisual services especially designed for the Hospitality industry.

We can provide guests with the best experience, thanks to efficient high-capacity fiber networks (GPON) combined with interactive leisure in their rooms (IPTV services, casting, VoD...).

Our broad experience developing comprehensive communication infrastructure allows hotels to offer all those services requested by customers, and those to be implemented in the future, obtaining additional benefits and a full user experience.

Interactive services

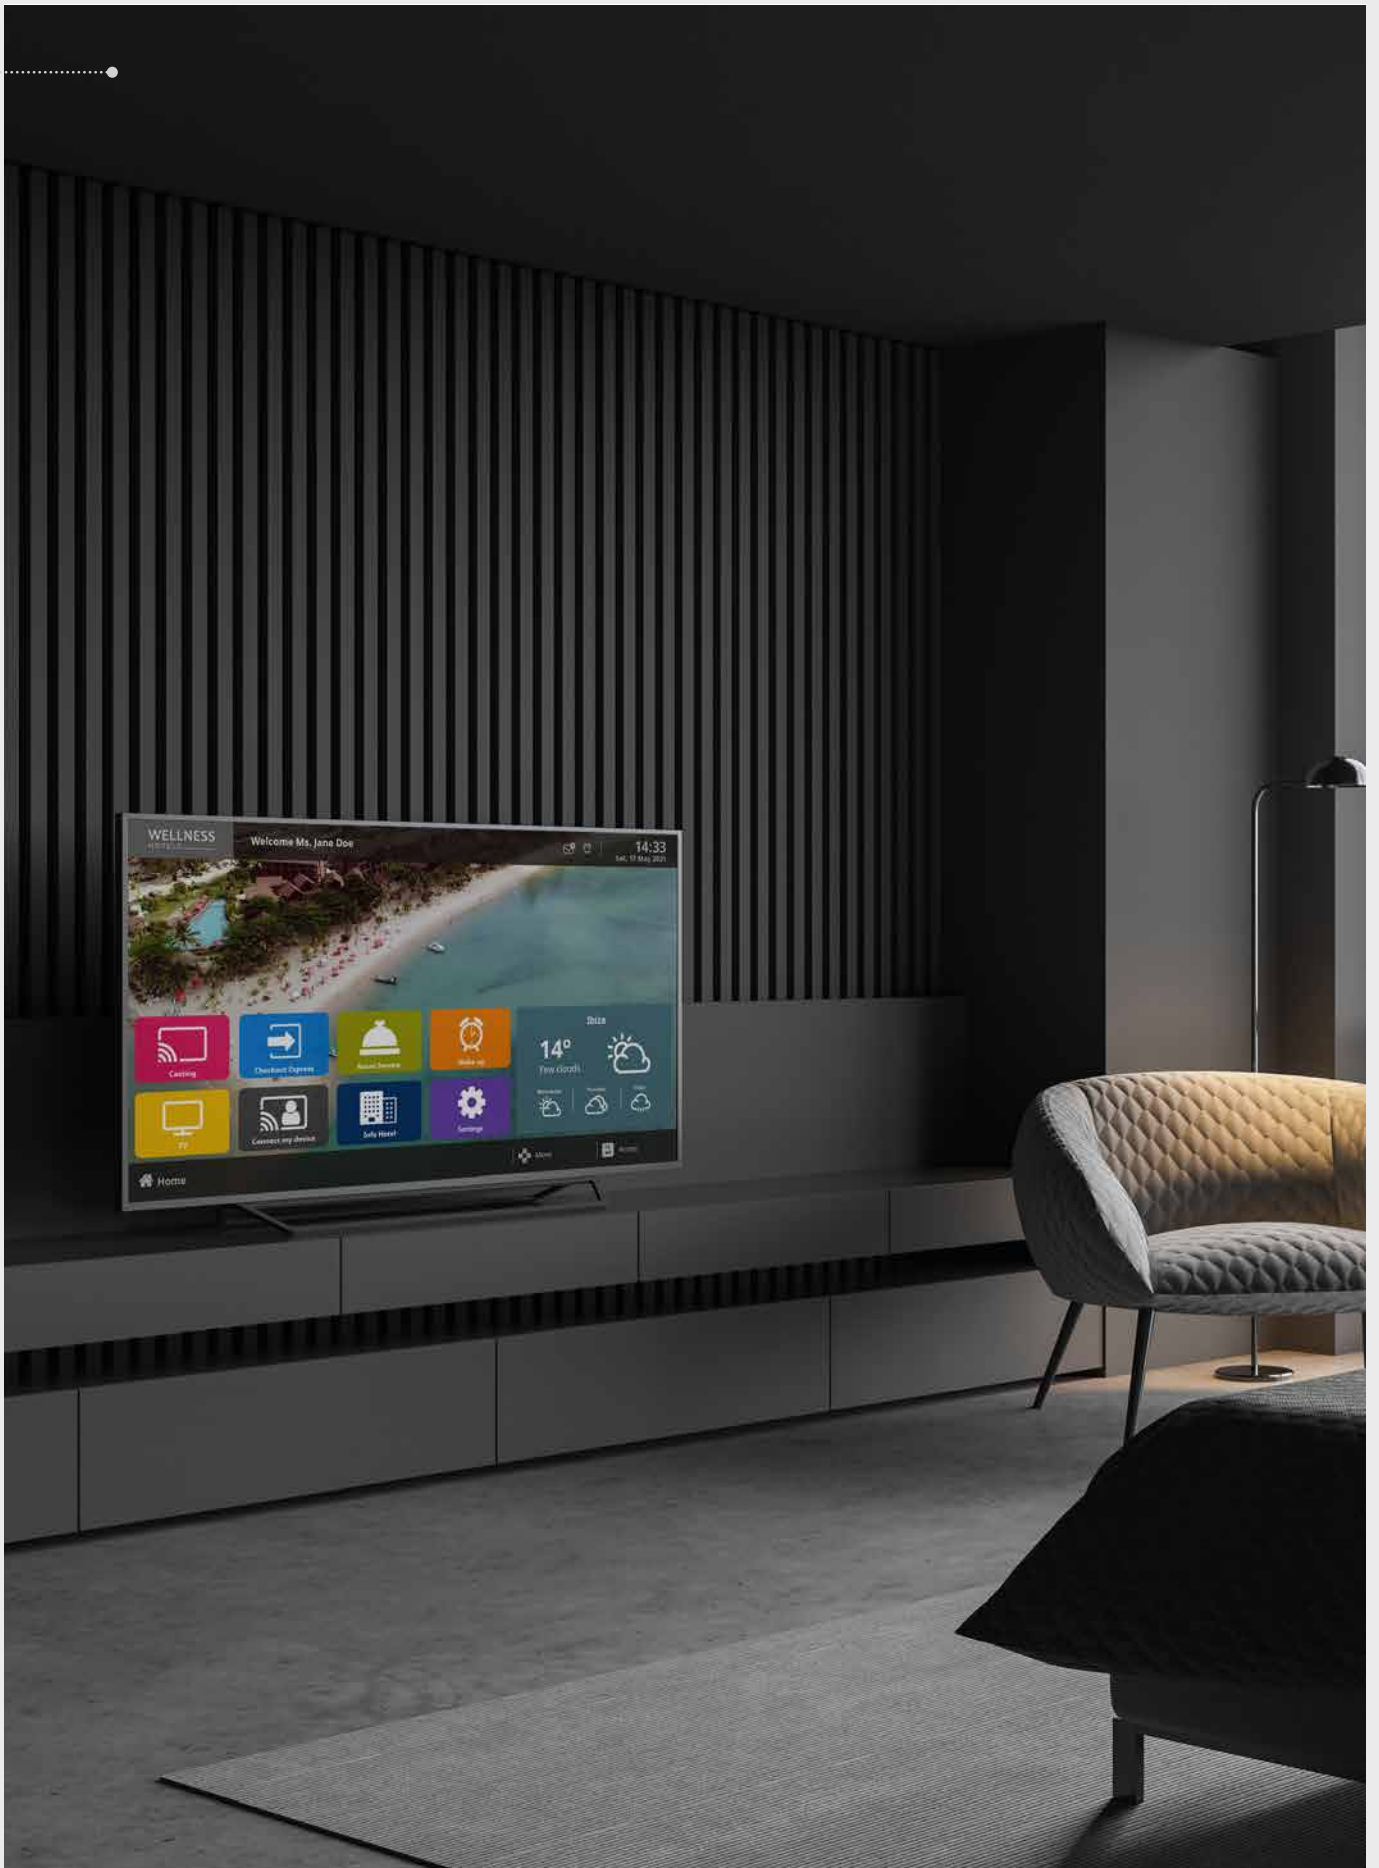

- IPTV Service
- nPVR Service
- VoD Service

The screen turns into a customized content library that is flexible to each user.

A modular platform that allows customizing the television for each client and offers all IPTV services on the screen.

It offers the guest the possibility to enjoy a new generation of television that can even be managed from their cell phone.

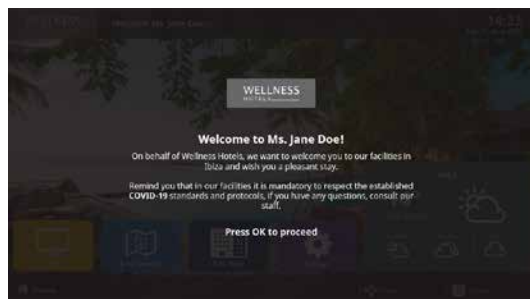

IPTV Service

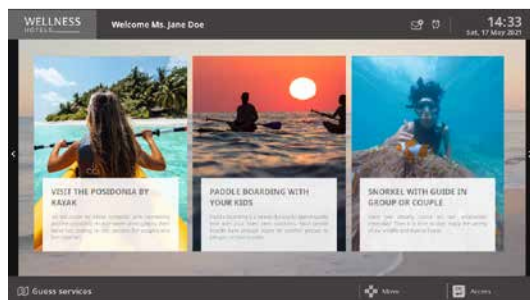

TV and radio

IPTV services allow for the distribution of customized TV and radio channel lists from DTT, satellite, cable or IP sources.

Integration by means of PMS and PMS Adapter

The guests' information, language or channel organization by country are automatically adapted in accordance with the information provided by the installed PMS.

General and useful information

Informative services display corporate and commercial contents with pictures and text.

Booking and shopping service

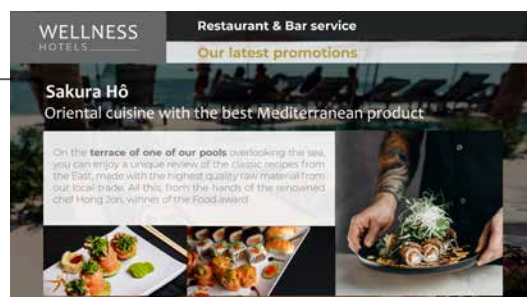

Guests can purchase or book the available products and services more conveniently from their room TVs.

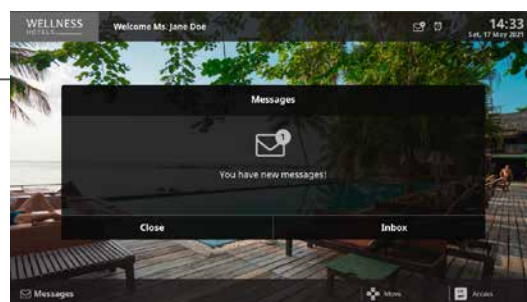

Corporate channel

TVs become information points used by the hotel to promote their room service, products or experiences especially designed to improve their guests' stay.

Instant messaging

The administrator can send from the reception customized messages to their guests.

Alarms

You can set alarms for specific times and dates.

TV Apps

Guests can start the available applications according to the manufacturer's repository.

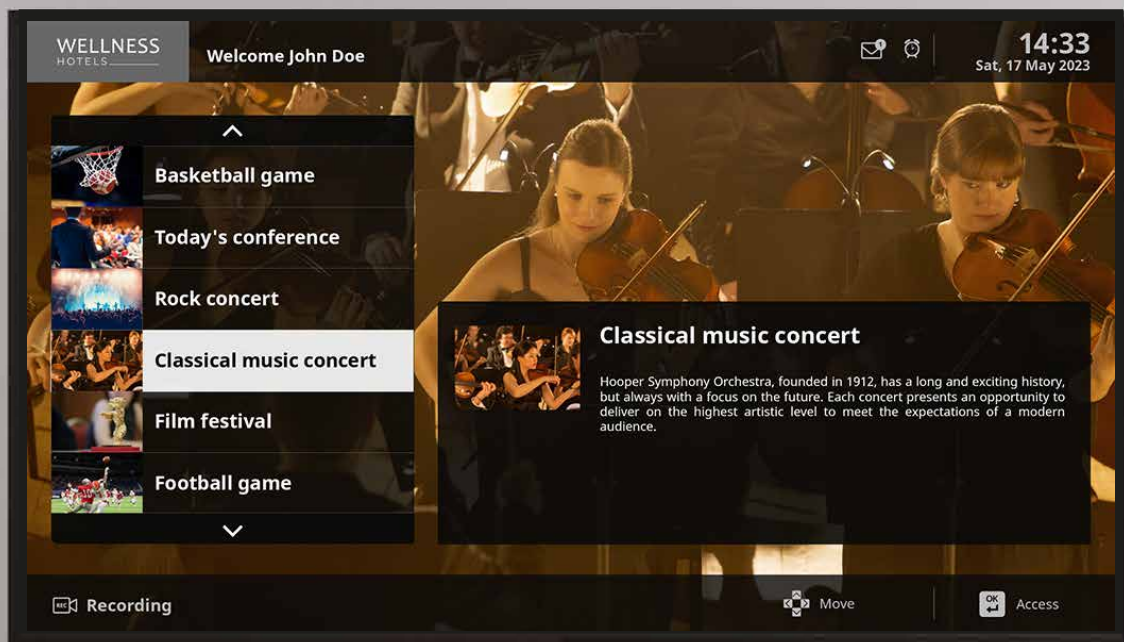

Further entertainment services can be integrated:

This system allows for the integration of further hired entertainment services such as streaming experience service, VoD service, nPVR service...

nPVR Service

The Network Personal Video Recording (nPVR) service is designed to schedule IPTV channel recordings and share them among the guests through an intuitive on-demand platform that they will access from the TV in their room.

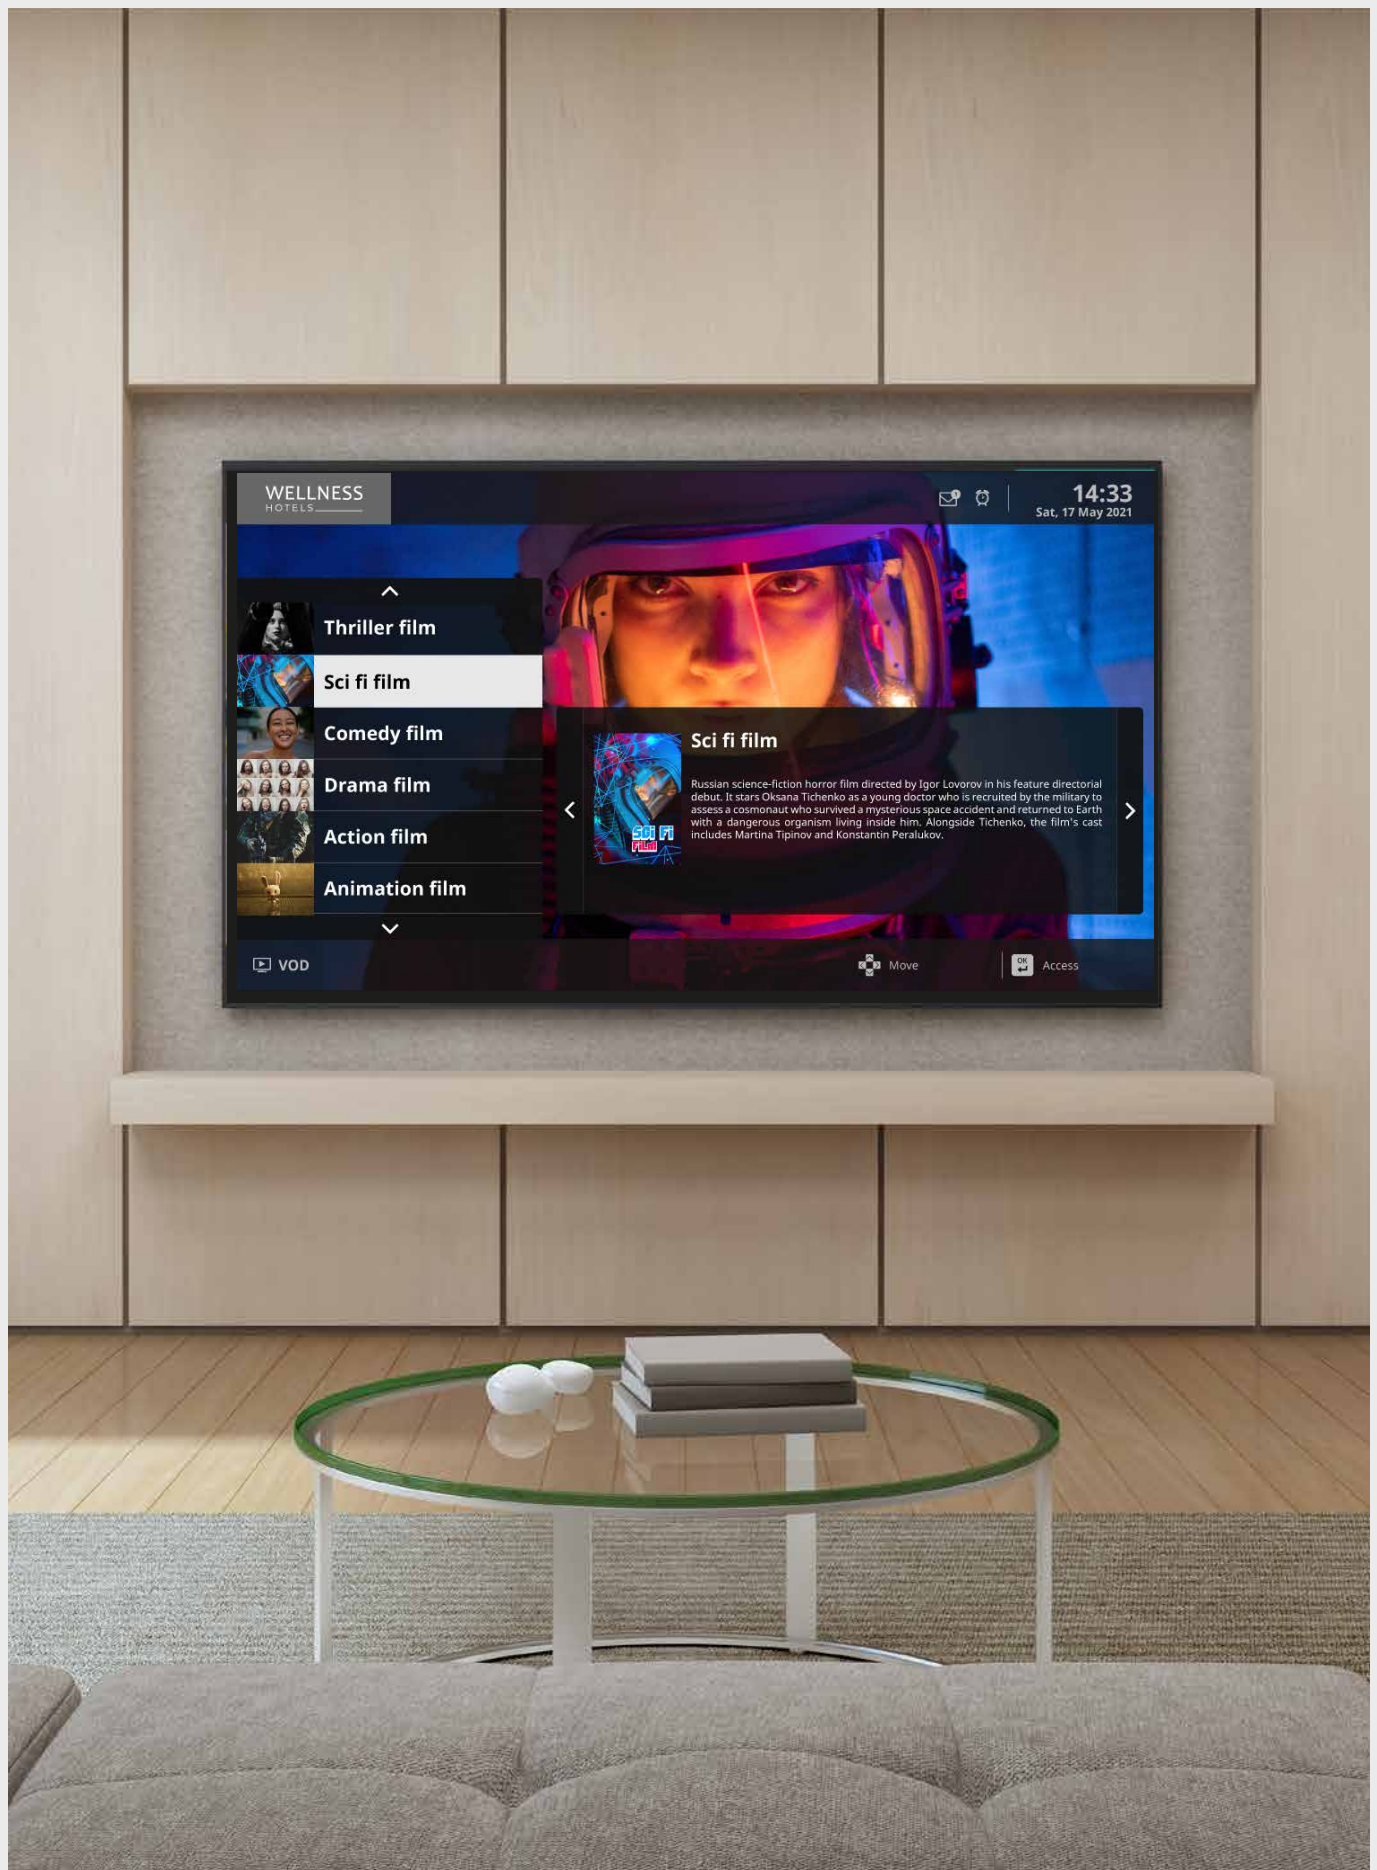

VOD Service

The Video On Demand service allows you to design an audiovisual content distribution platform through the TV system installed in guests' rooms.

With this service, each television installed in the guest rooms becomes a content library accessible at any time.

This service is endorsed by Swank Motion Pictures, Inc. – one of the most important providers of on-demand contents from the most relevant movie studios – and is available in several establishments of the Hospitality industry.

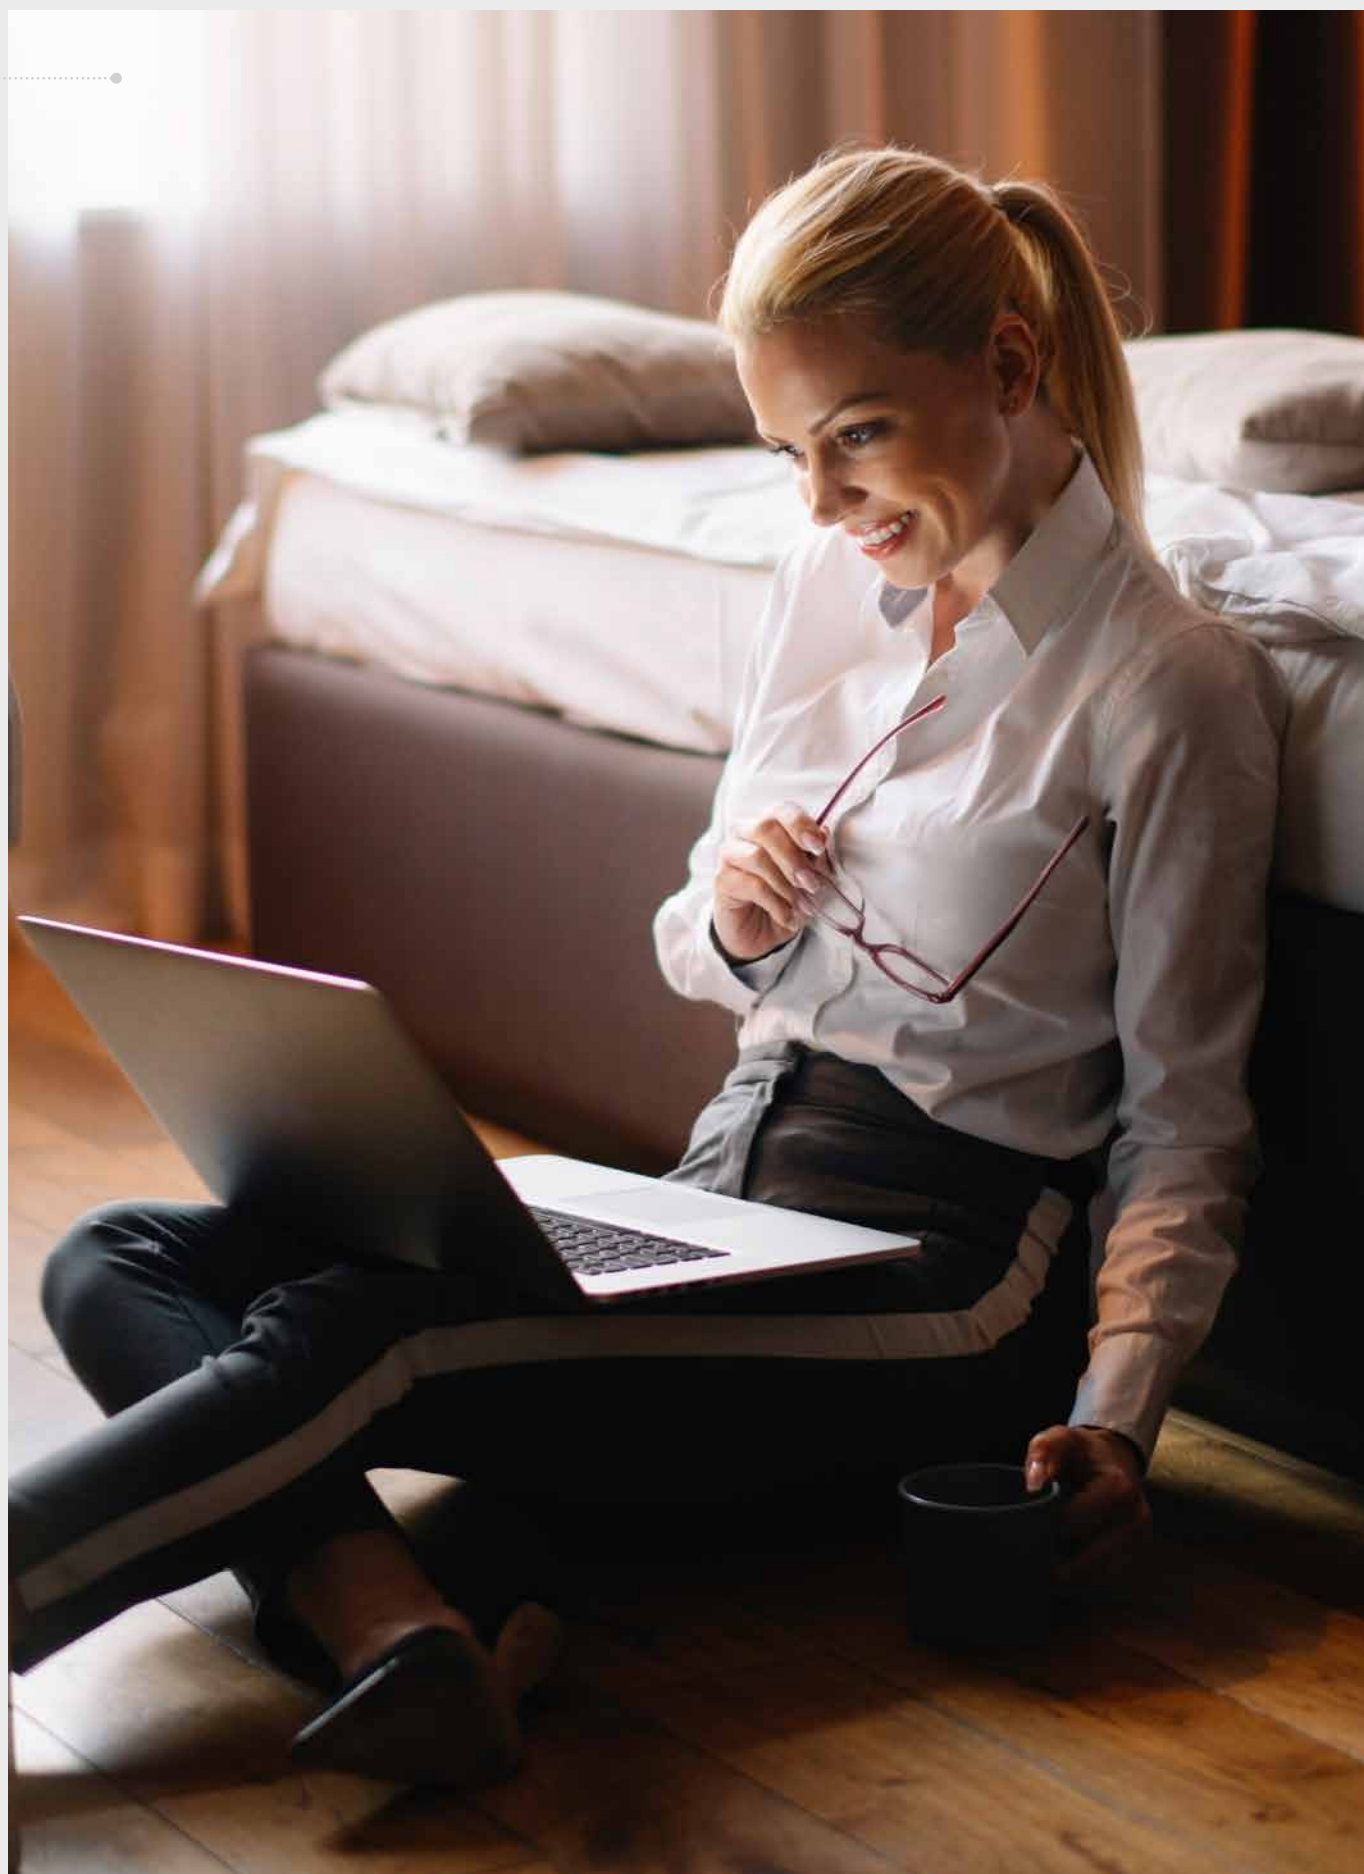

WI-FI

High-capacity connectivity and guaranteed coverage.

Televes develops a set of solutions to ensure efficient, safe and responsible access to the Internet within a high-capacity, multiservice network infrastructure.

By means of coaxial, Ethernet and FO cable, our solutions can tackle connectivity issues that normally arise at hotels.

Streaming experience

With ArantiaCast, we offer content streaming both in the hotel television and at home.

ArantiaCast is a professional casting solution designed for hospitality environments where there are numerous users and ensuring the guests' privacy should be one of the main concerns for the hotelier.

With this service, users can cast a wide range of contents from their personal devices to the TV, such as series, movies, music, news, sports, etc.

Once the ArantiaCast system has been integrated in the hotel's WiFi network, users can easily pair their devices with their room TV by reading a QR code.

Discreet installation that does not alter any aesthetic or functional feature of the room. With ArantiaCast, you can monitor the network remotely and add extraordinary value to your hotel.

Digital signage

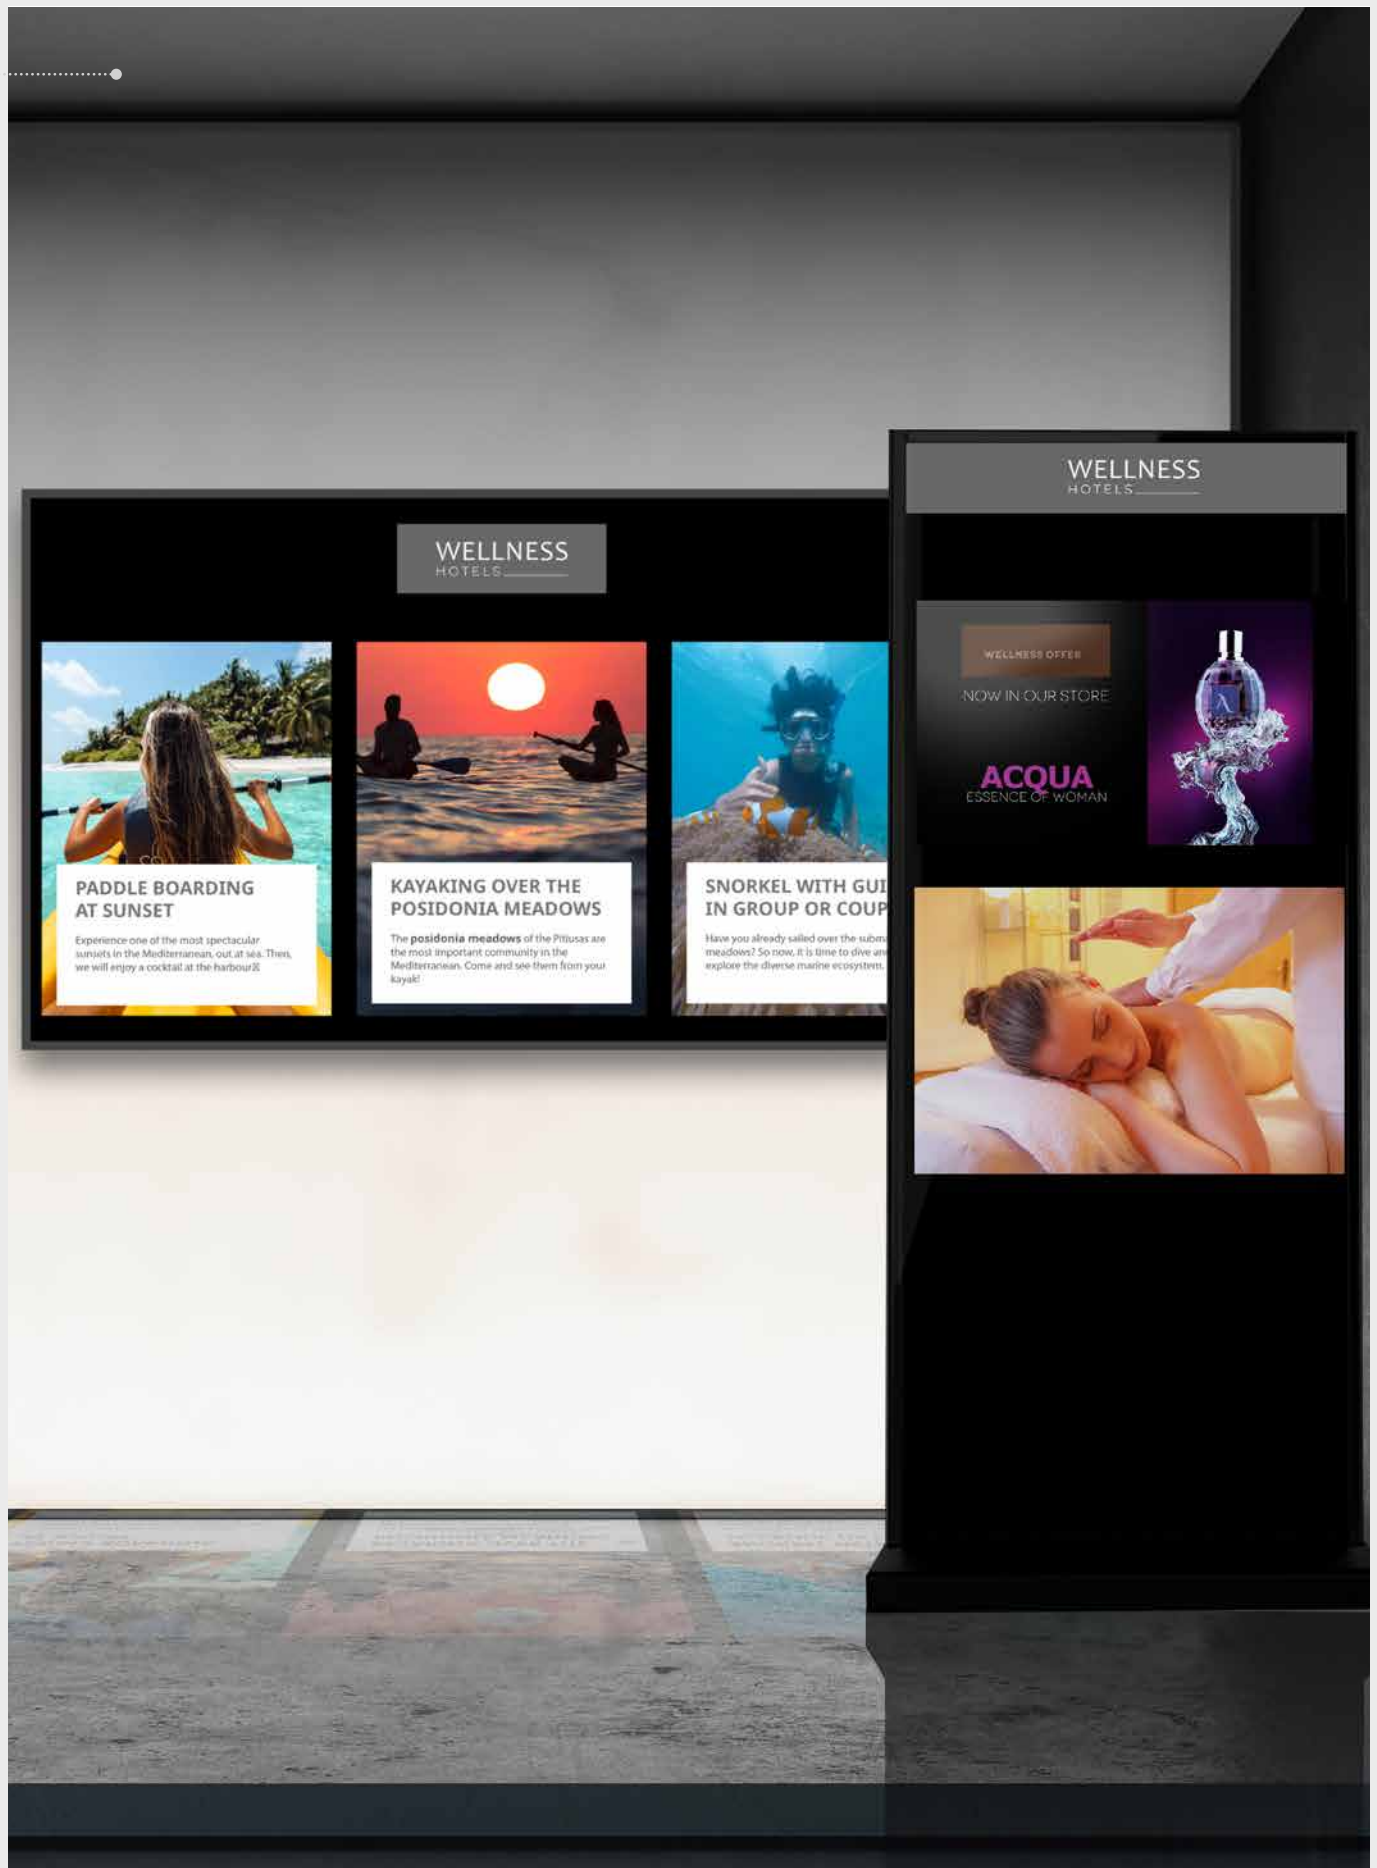

- **Corporate Channel**

Every hotel screen becomes a strategic point for information or advertising.

Arantia DS allows the creation of new points for updated information using the existing screens or installing totems in strategic areas in the hotel. Both a remote and a centralised management can be utilised. This solution offers several design options and content intended for guests: external advertising, activity promotions, internal offers...

Strong points:

- **Flexible:** numerous contents can be added to the screen.
- **Scalable:** it can be adapted to different needs, from single points to multiple points in different locations.
- **Easy to use:** contents can be created online from the web portal.

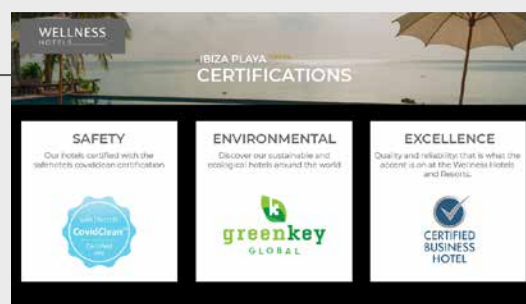

Corporate Channel

The Corporate Channel is the ideal tool for hotels and hotel chains seeking to easily share commercial information with their customers in any room. It allows the promotion of services, attract clients and shares relevant news in an easy and quick way.

Promote the brand and improve the company value information

In order to generate a major impact and improve the perception that the guests have of the hotel, the Corporate Channel gives the possibility of sharing all it can offer, like the quality of the services, the initiatives undertaken, the environmental and social commitment or the quality certificates.

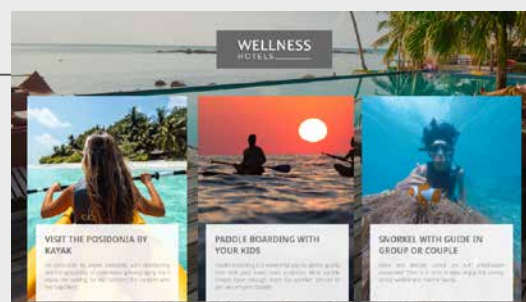

Interesting and updated information

With this solution it is possible to reach the costumers quickly and to keep them informed with the changes and recommendations adapted to the actual context.

Unforgettable experiences

In order to promote the multitude of entertainment options offered by the surroundings among the guests, the Corporate Channel gives the option of expanding the leisure offer by displaying information about tourists visits, nature hikes, tours to iconic places or sporting experiences that will create unforgettable experiences.

Everywhere

The Corporate Channel allows all the hotel departments to be included in the information, adding more value to the messages that are transmitted.

The information goes beyond the reception screens, and it is possible to broadcast the desired content in every corner of the hotel: rooms, gym, restaurant, halls, elevators, pool...

Direct promotion of products and services

It helps to improve the sales exponentially, as well as to enhance all the services and entertainment options offered by the hotel so that the guests could enjoy a great experience.

Integration with other entertainment services (*)

Another option offered by this service is the integration of other entertainment services, in order to improve the clients' hotel experience, just like home.

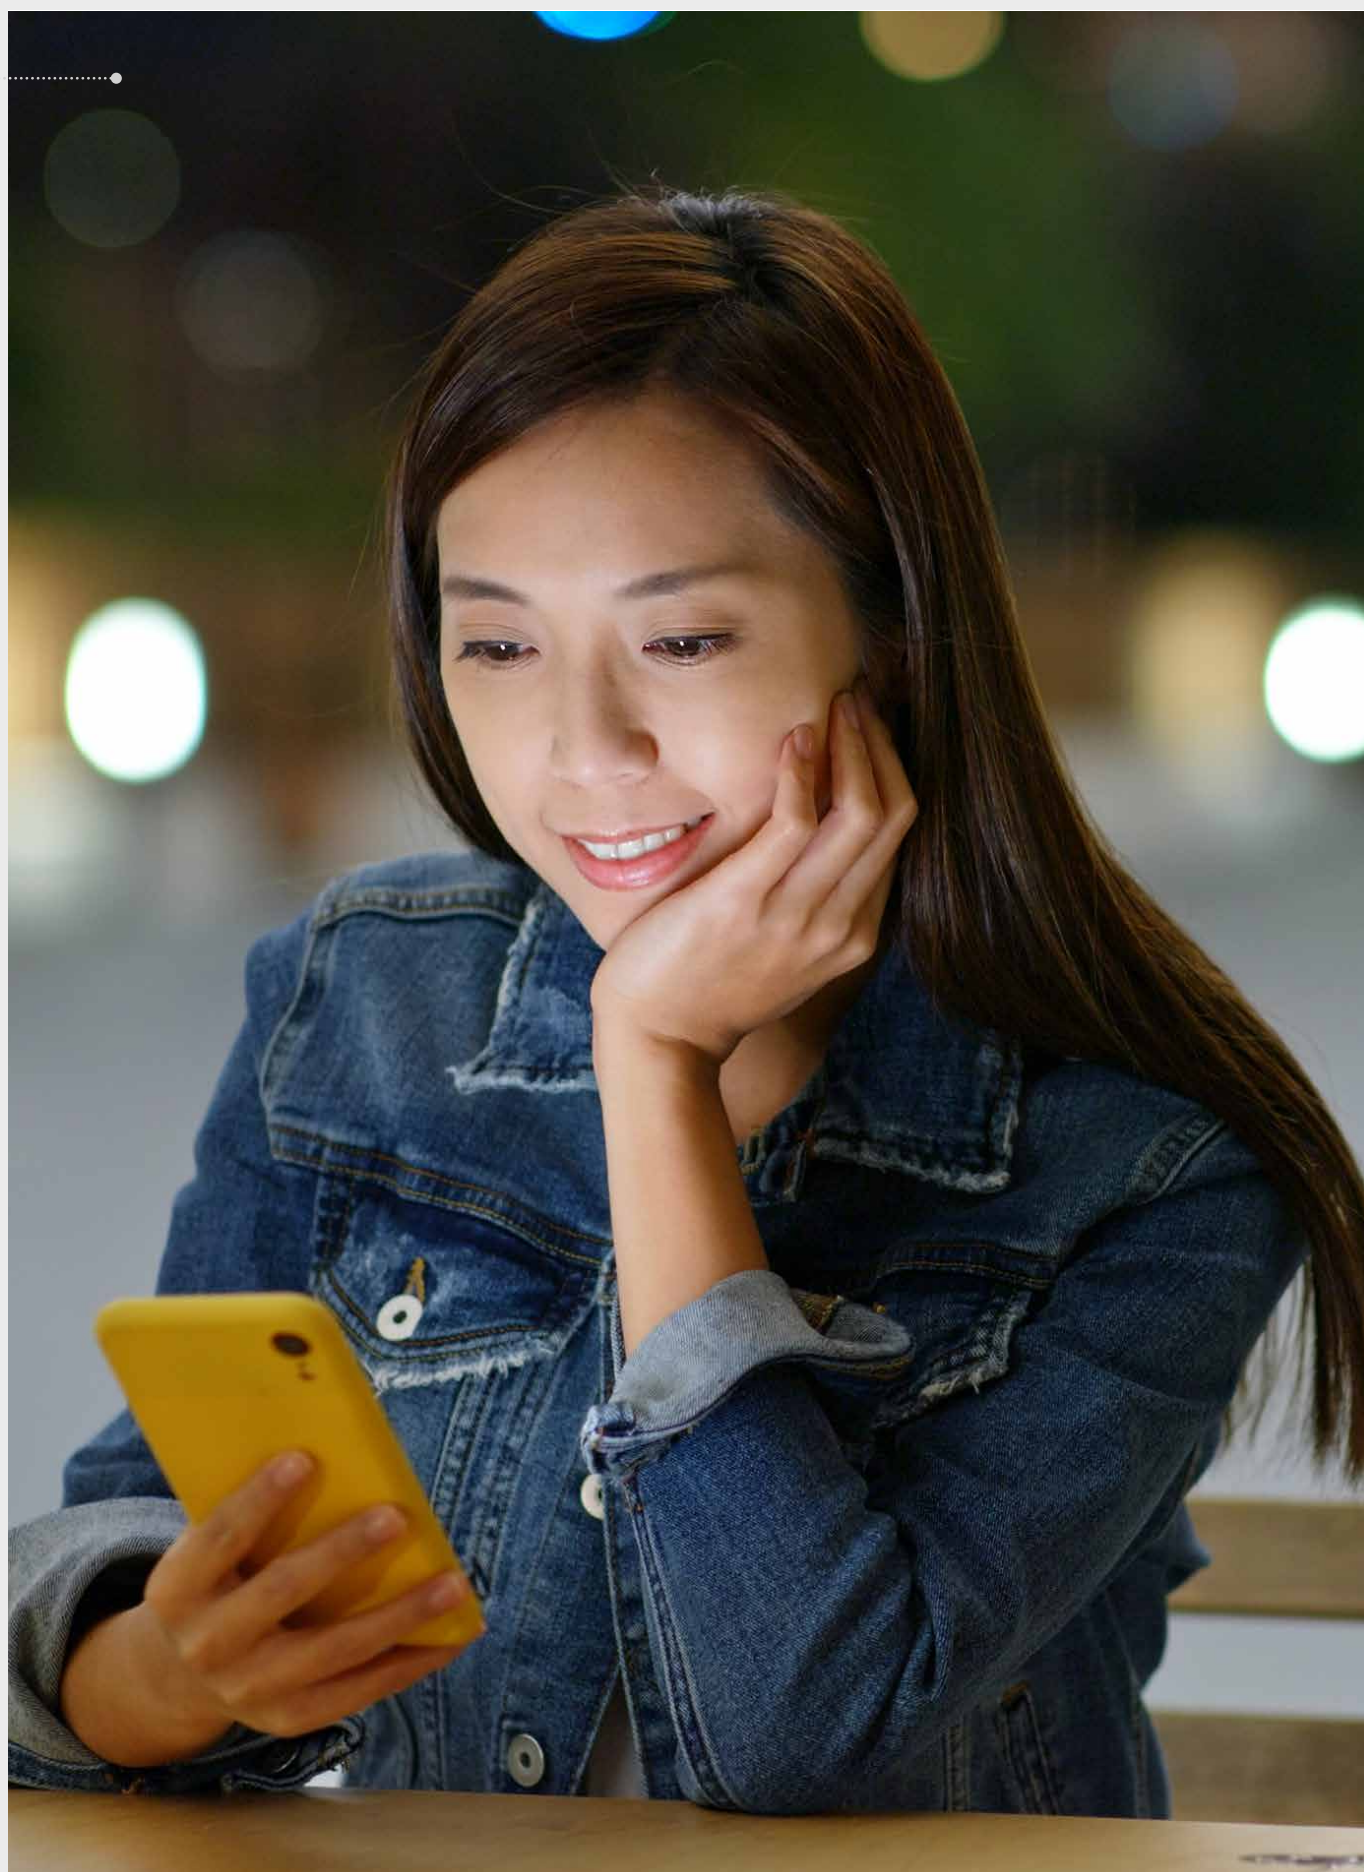

(*) These services are not included in the Corporate Channel, but must be purchased separately.

Expand TV

The hotel television on your mobile: Watch television while enjoying outdoors.

With the Expand TV service, an OTT platform can be created especially for your hotel's common areas. Guests will be able to watch Premium channels available in their rooms on their mobile device from any corner of your hotel, by just connecting to the hotel's Wi-Fi network.

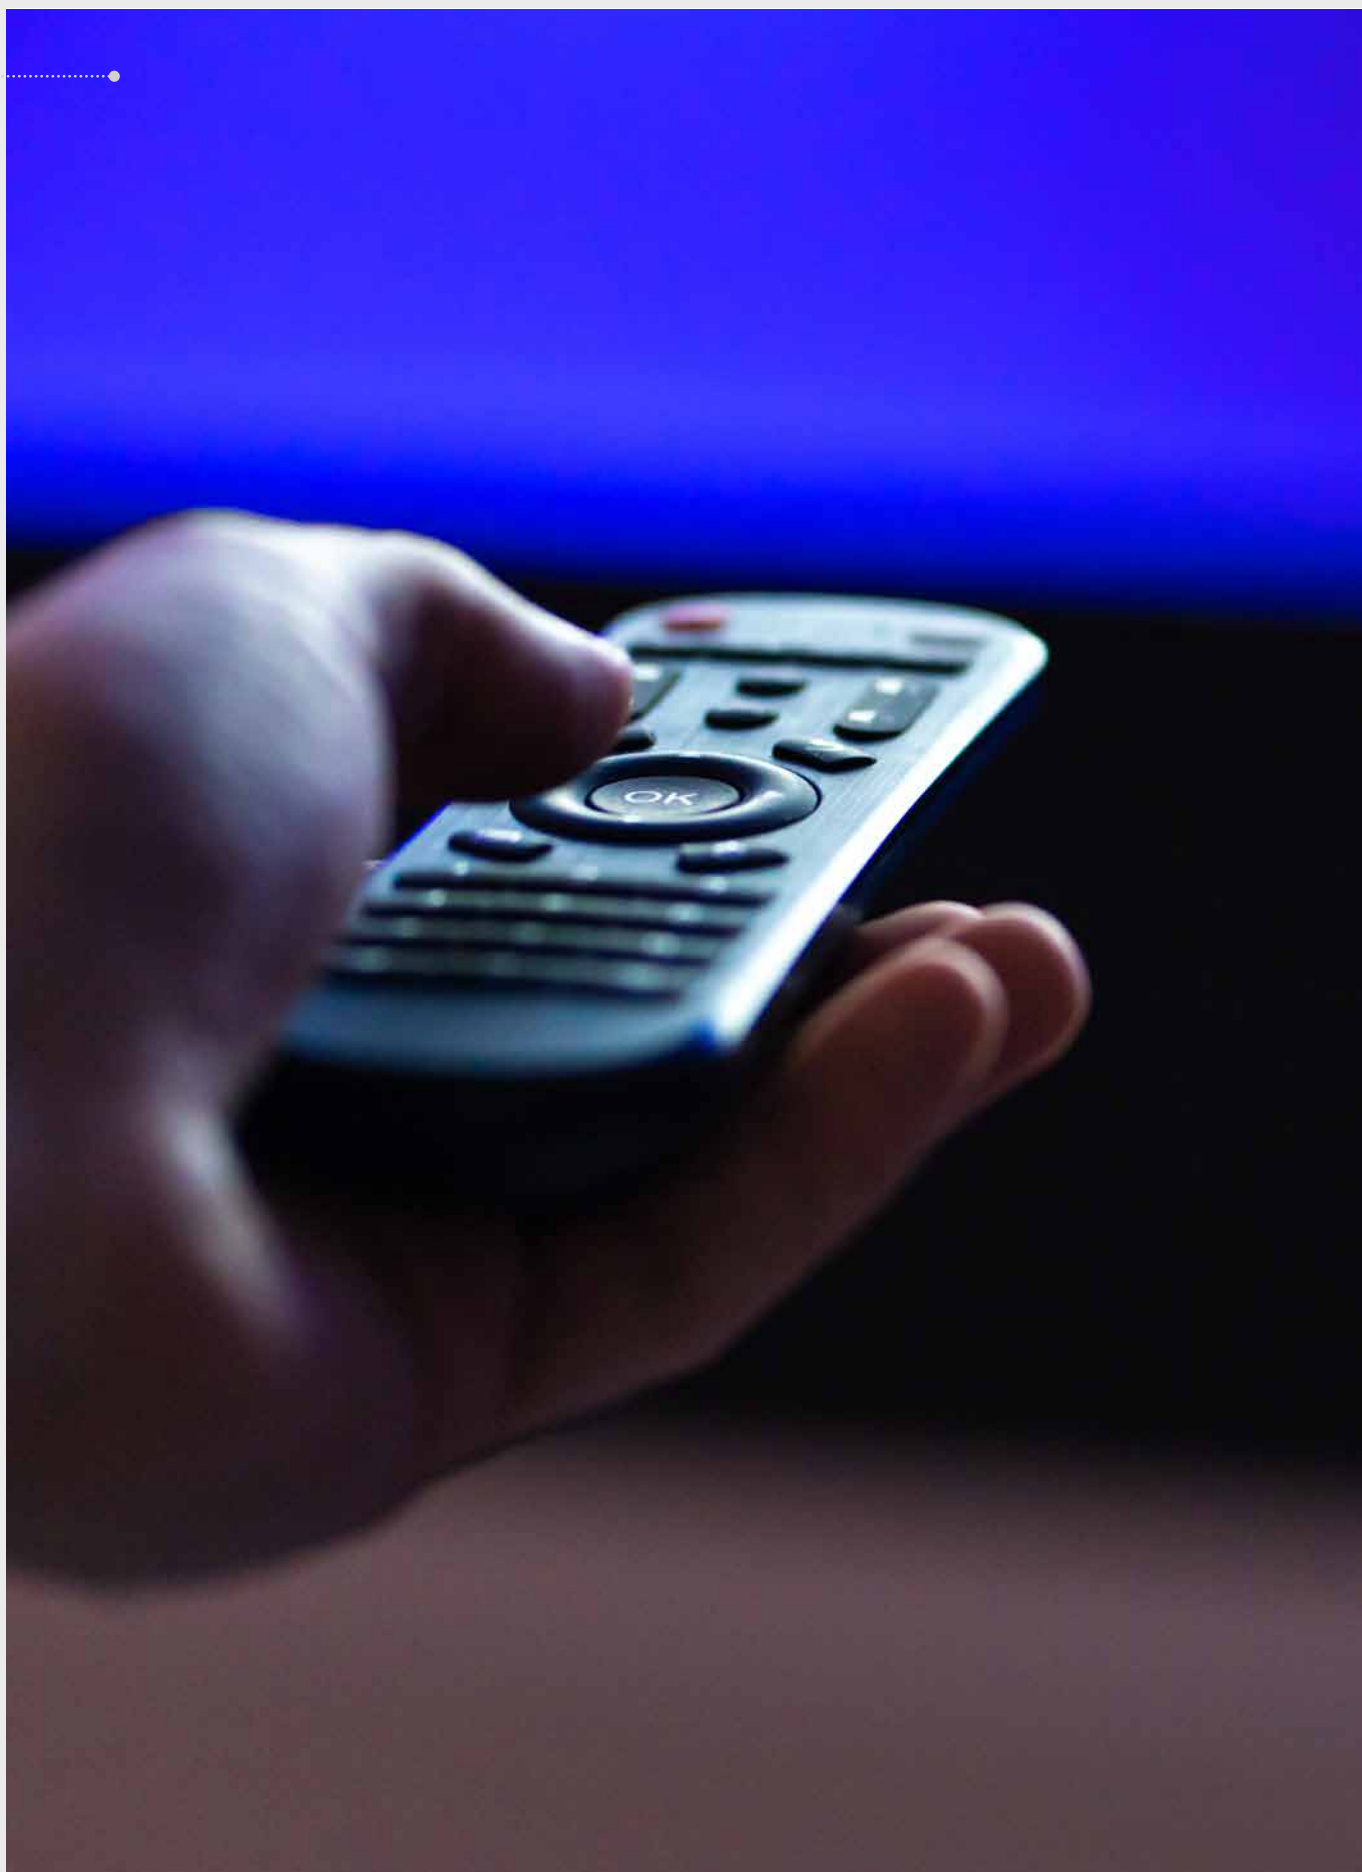

TV

**TV as you have always known
it now available anytime,
everywhere.**

Televes provides all the equipment required for the reception and processing of conventional television (DTT, Satellite, and Cable) to be distributed either over coaxial cable or optical fibre.

VoIP telephony

The new form of telephony.

Thanks to VoIP, you can digitize your hotel's phone and communication services to provide your guests with enhanced performances. VoIP technology will allow you to simplify your communications, cut down on costs and improve productivity notably.

Our products and services reach more than 100 countries, more than 500,000 rooms equipped with our solution.

TELEVES' SOLUTIONS CAN HELP HOTELS TO MEET THEIR PRESENT AND FUTURE AUDIOVISUAL REQUIREMENTS.

Televes has 10 international subsidiaries

- Portugal
- France
- United Kingdom
- Italy
