★★★★☆	1995	Cine dramático/Comedia

One of the best films of recent times; the Oscar winner for best film of no English speaking, Bafta in the same category, and 9 awards David de Donatello, included director and stakeholder (Toni Sevillano). A journalist called Jep Gambardella live of success that his only published novel produced for decades. Admired whole time by criticism and public, Jep discovers by the age of 65 that he needs a change in his life and that...

Television Audio Subtitles Move Change channel

VOD AND PVR

Transform your Hotel in a supplier of on-demand audiovisual content, convert each television into a content library that increases the quality and profitability of your property.

VOD will allow your guest to select content from a library provided and maintained by the property, where you will find multiple content.

PVR server (nPVR, network PVR) allows to make recordings from TV channels generated by the IPTV headend. These recordings can be managed by a system administrator or by the user.

CORPORATE CHANNEL

Television will be converted into personalized information points since the company will be its own contents producer. This is an information channel where advertise events, promote the boat, etc.

MIRRORING AND CASTING

Mirroring services are offered through WiFi STBs or directly through TVs that support wireless screen mirroring technologies.

ArantiaCast is a casting system that allows each user in a multiuser environment to have its own exclusive associated device. Without any login or password, and with automatic disconnection when the guest checks out through the PMS.

- Content streaming on the television set, just like home.
- No login, password or personal information from the guest required.
- Compatible with any television set equipped with an HDMI connector.
- Over 1,000 applications available for Casting (Netflix, HBO, Youtube, etc.).
- Multiple mobile devices can be connected to the same room's Chromecast.
- Internet browsing available using compatible APPs (Chrome...)
- Document viewer available thanks to compatible APPs (LocalCast pdf..)

STREAMING EXPERIENCE

THE GUEST WILL FEEL AT HOME

NETFLIX

Ready to send contents

- The system allows the advanced remote monitoring of the installed devices
- The Chromecast installation on the television sets is carried out in an unobtrusive and safe way
- Streaming will only be allowed on the television set of the guest's own room
- Disconnection from the system takes place on checkout

TV APPLICATIONS

Arantia TV system implementation in supported Hospitality TVs with embedded STB allow the user to launch the available applications according to the TV manufacturer repository.

These applications can come preinstalled or be available to download and installation using the TV remote control, thus ensuring an integration, functionality and stability with the TV brand/model to use.

The applications which do not meet the manufacturer requirements or that are not available for installation, emission or reproduction according to content rights policies will not be installed.

The credentials erasure is executed automatically during the check-out procedure, functionality that can be integrated with the Property Management System. The user will be also able to erase the credential on demand through a specific option included in the user interface.

INSTANT MESSAGING

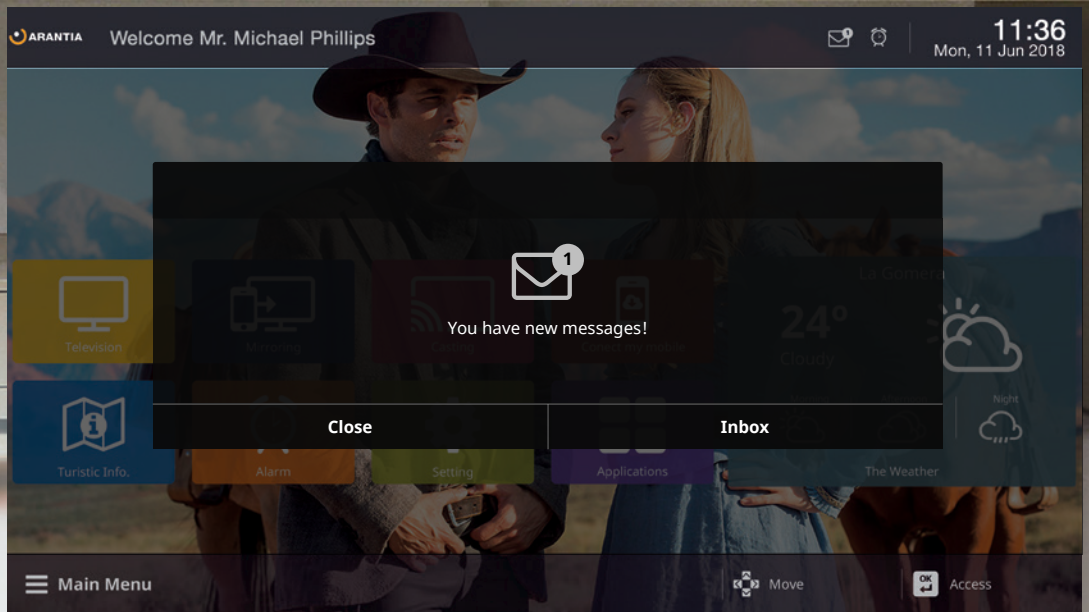

The administrator can launch customized messages from the reception to the guests.

This is a flexible way for publish personalized events.

TV APPS >

MESSAGES >

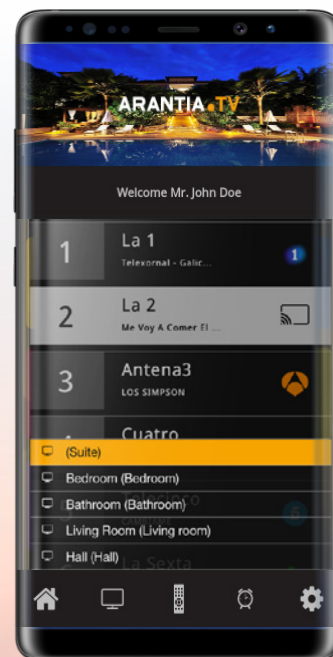

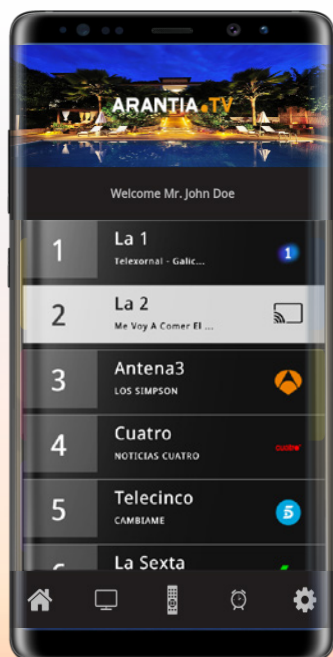

MOBILE APPLICATION

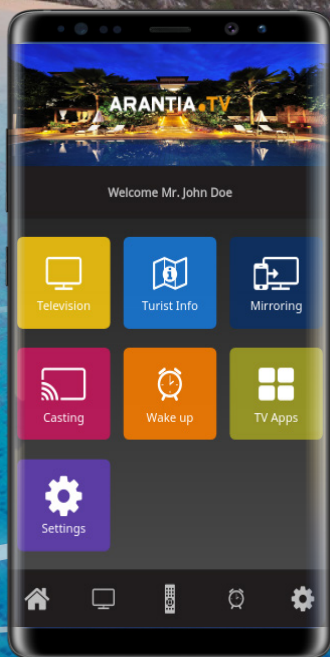

The mobile application will be available for downloading and installation from the App Stores according mobile devices OS, iOS and Android.

Once the application has been downloaded and installed and the mobile device is connected to the WiFi network (Arantia TV Middleware should be reachable from this WiFi network), the user will have to enter a numeric code in the mobile application. This code will be shown on TV, inside Connect My Device Service.

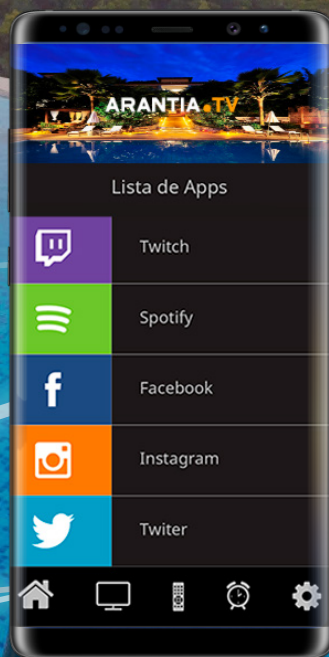

Once the user has entered this code in the mobile application, the application will be registered at the IPTV system and it will offer the user access to the interactive services available at the system.

Surfing across the TV channels and accessing EPG information. If you want to display a TV channel on the TV, it will only be necessary to press the “transmission” icon.

IPTV system menus navigation using the mobile APP without disrupting the content that is being displayed on the TV.

Possibility of launching on the TV any of the APPs that are already installed in it by selecting them through the list displayed on the mobile application menu.

Use of mobile devices as TVs remote control.

ARANTIA.DS

THE DIGITAL SIGNAGE SOLUTION

Televés Digital Signage solution has an intuitive and easy to use management software, through which it's possible to create, manage and deploy custom contents in the system.

KEY FEATURES ARE:

■ FLEXIBILITY

Execute Arantia DS Manager from any desktop or laptop computer from anywhere in the world, through your web browser and independently of your operating system.

■ SCALABILITY

Arantia DS provides a solution that can be adapted to all kinds of needs, sizes and budgets. Televés Digital Signage allows you to improve your target audience, whether you have a modest business with a single screen or a large network of offices in different locations.

■ SIMPLE TO USE

Thanks to its intuitive interface, the smart content designer with predefined templates and guided steps to help you enter data, no previous experience will be required to use our software. Upload files, create contents and program events in four easy steps, in a simple and intuitive way and from any PC or laptop.

ANOTHER OPTION

■ RELIABILITY

Arantia DS can be integrated with Televés's monitoring equipment to check connections and services.

■ SECURITY

The security and integrity of your information during content transfer is guaranteed, even when carried out through the Internet, thanks to the use of secure connection encryption technologies.

A comprehensive management of users allows you to assign permissions and profiles to your employees, enabling the hierarchical management of your Digital Signage.
