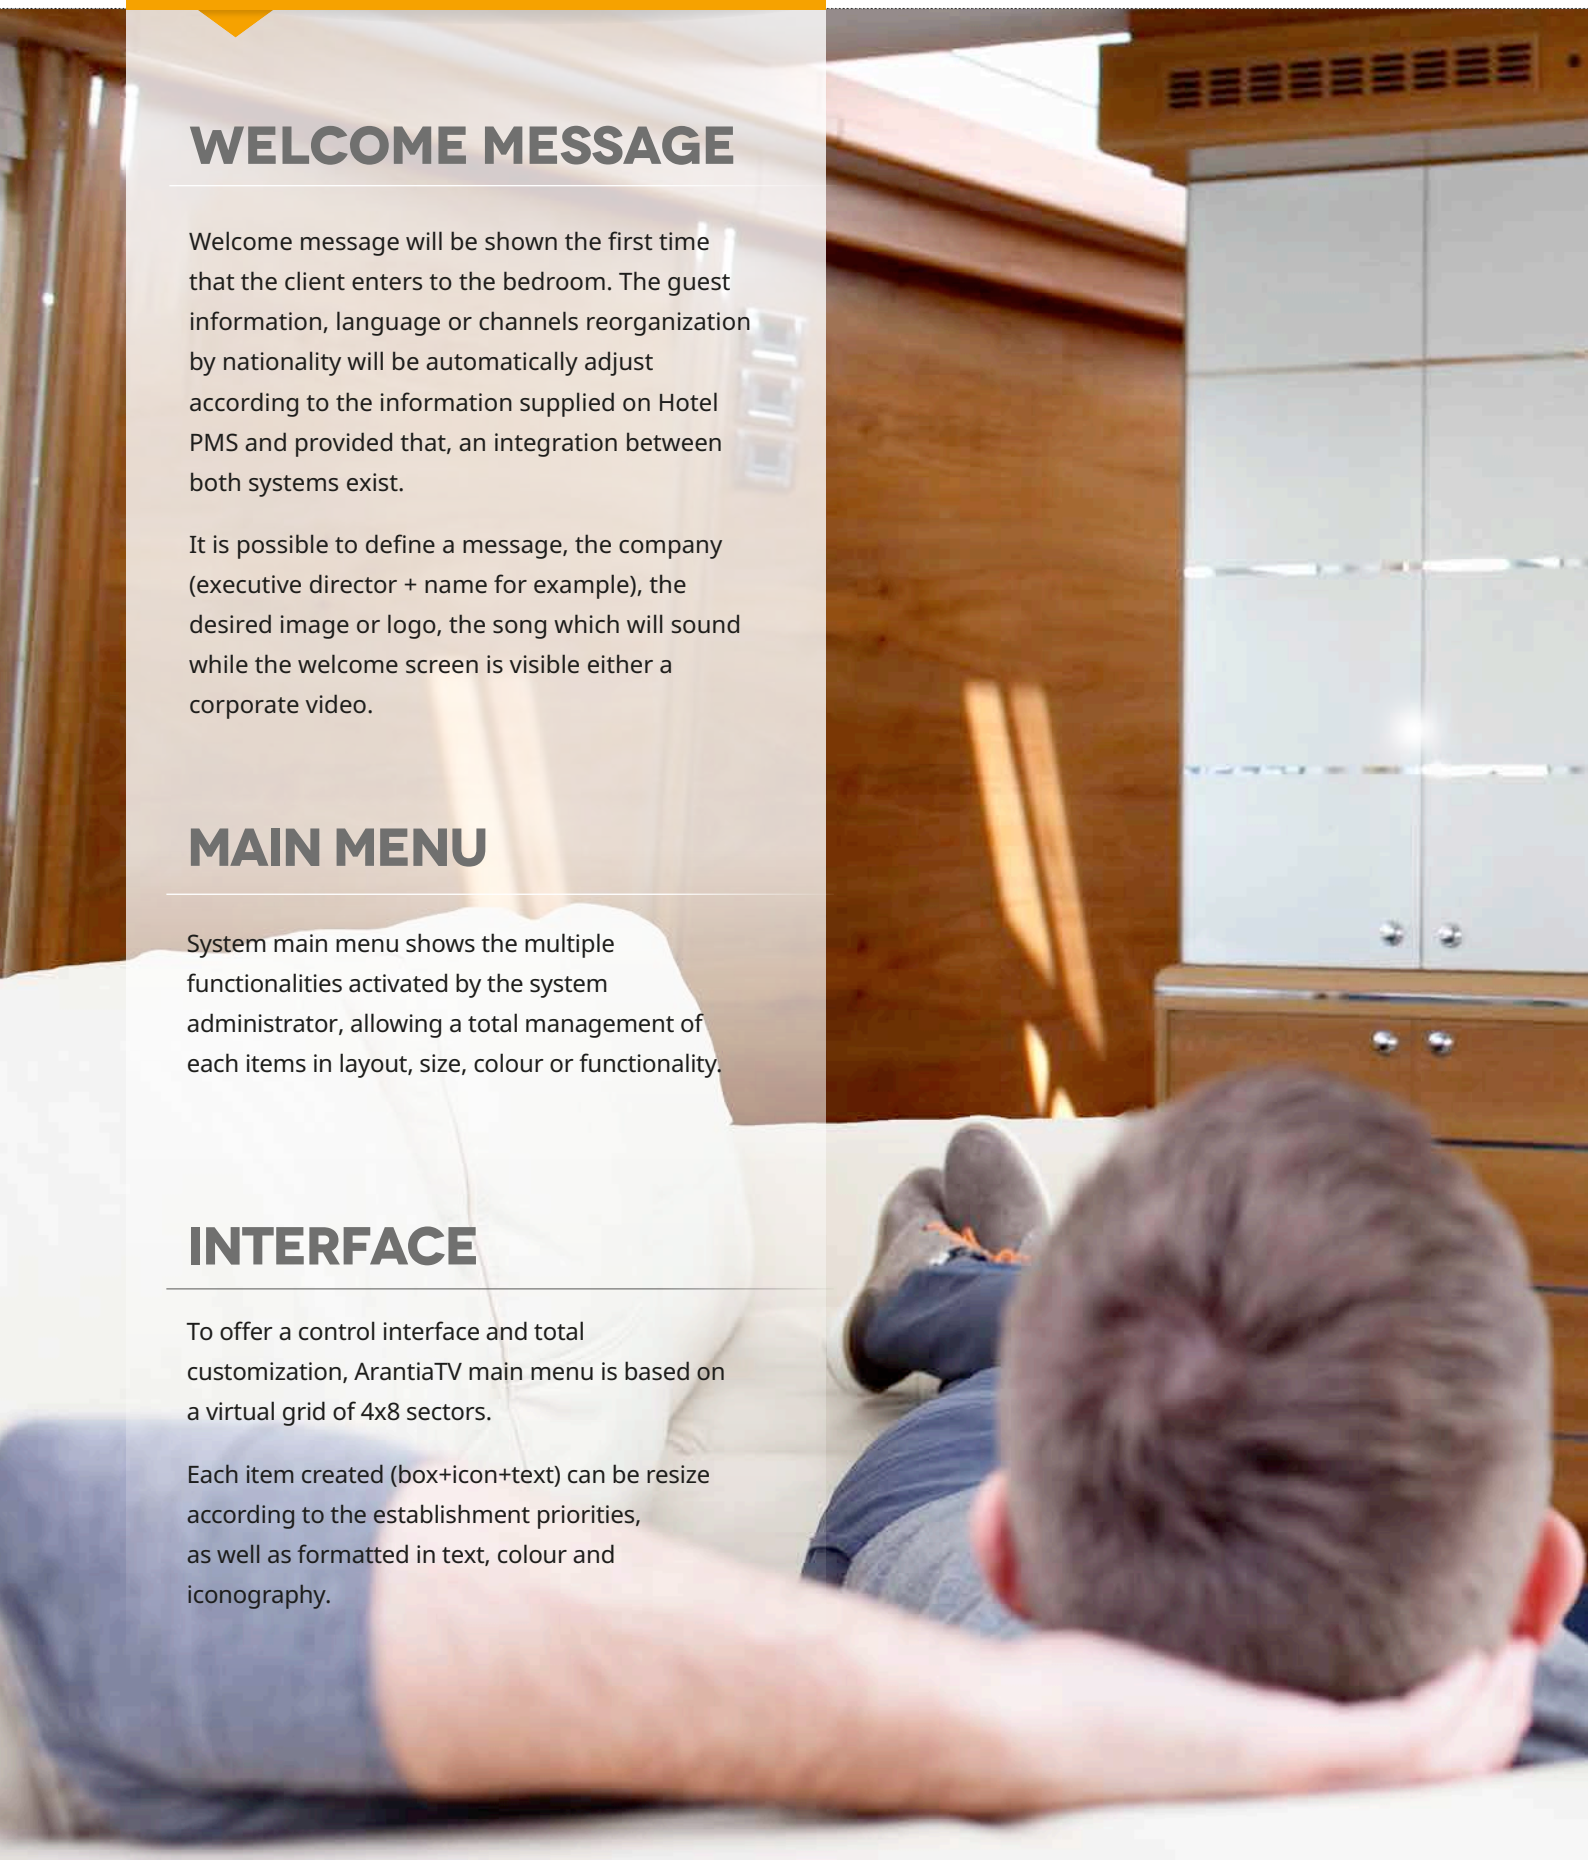
PERSONALIZED CONTENT



WELCOME MESSAGE

Welcome message will be shown the first time that the client enters to the bedroom. The guest information, language or channels reorganization by nationality will be automatically adjust according to the information supplied on Hotel PMS and provided that, an integration between both systems exist.

It is possible to define a message, the company (executive director + name for example), the desired image or logo, the song which will sound while the welcome screen is visible either a corporate video.

MAIN MENU

System main menu shows the multiple functionalities activated by the system administrator, allowing a total management of each items in layout, size, colour or functionality.

INTERFACE

To offer a control interface and total customization, ArantiaTV main menu is based on a virtual grid of 4x8 sectors.

Each item created (box+icon+text) can be resize according to the establishment priorities, as well as formatted in text, colour and iconography.

< WELCOME

ARANTIA •TV

Welcome, Mr. Michael Phillips

Warmly greeted and welcomed in our hotel Arantia TV.
We are happy to have you here and wish a nice stay.

PRESS MENU TO PROCCED

MAIN MENU >

INTERFACE >

TELEVISION & RADIO

IPTV services allows distribution of TV and Radio channels from DTT, satellite, cable or IP sources, enabling all services provided are incorporated into a single system regardless of the source.

It is possible include thus, A/V signals of multiple origin, as CCTV or ECDIS systems.

Channels list shows:

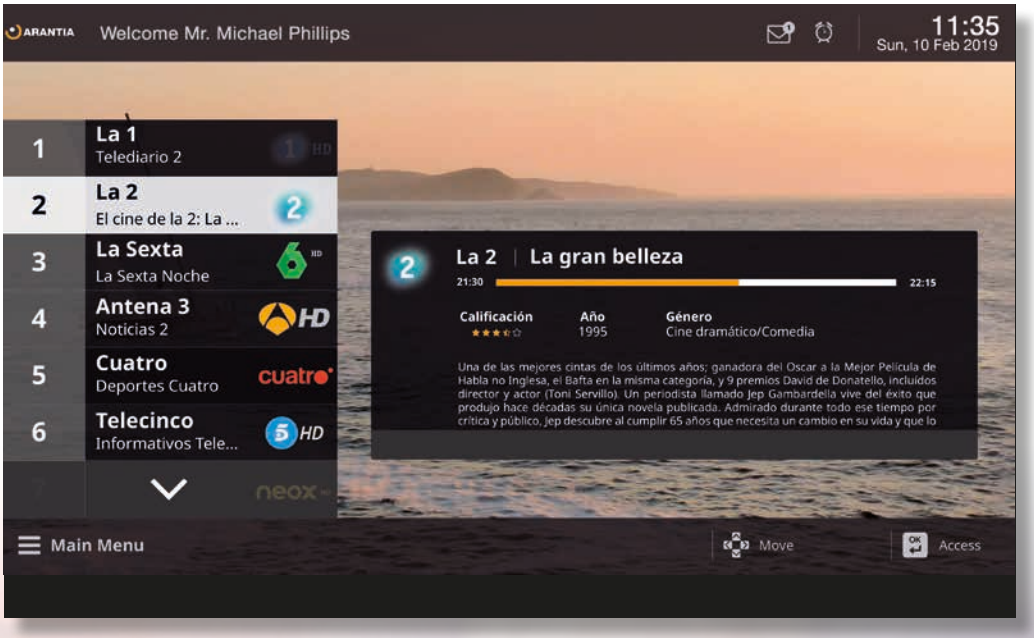
- Numeric location of channel access (number from 1 to XXX).
- Program name and current broadcast.
- Channel icon.

On the screen right part will be open the channel complete information, showing current broadcast and posterior expanded information (EPG).

Radio channel are integrated into the system as if they were a television service, even allowing the specific package generation.

Pause and playback service is available to the users.

CHANNELS MENU>

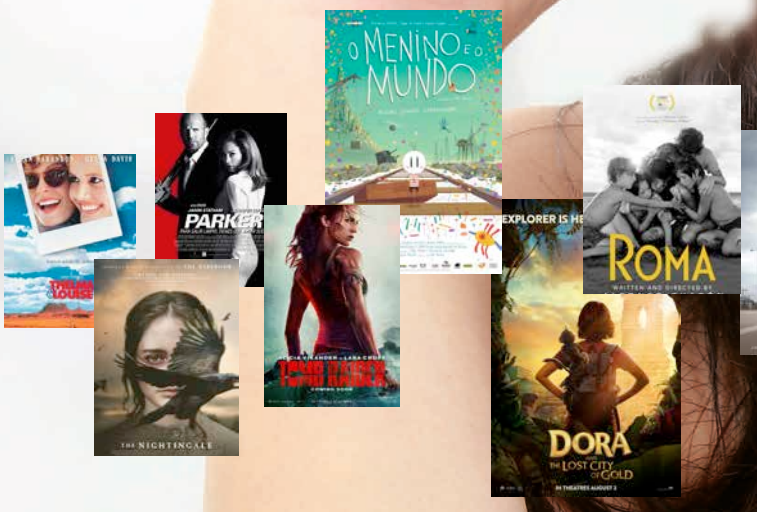


VOD AND PVR

Transform your Hotel in a supplier of on-demand audiovisual content, convert each television into a content library that increases the quality and profitability of your property.

VOD will allow your guest to select content from a library provided and maintained by the property, where you will find multiple content.

PVR server (nPVR, network PVR) allows to make recordings from TV channels generated by the IPTV headend. These recordings can be managed by a system administrator or by the user.

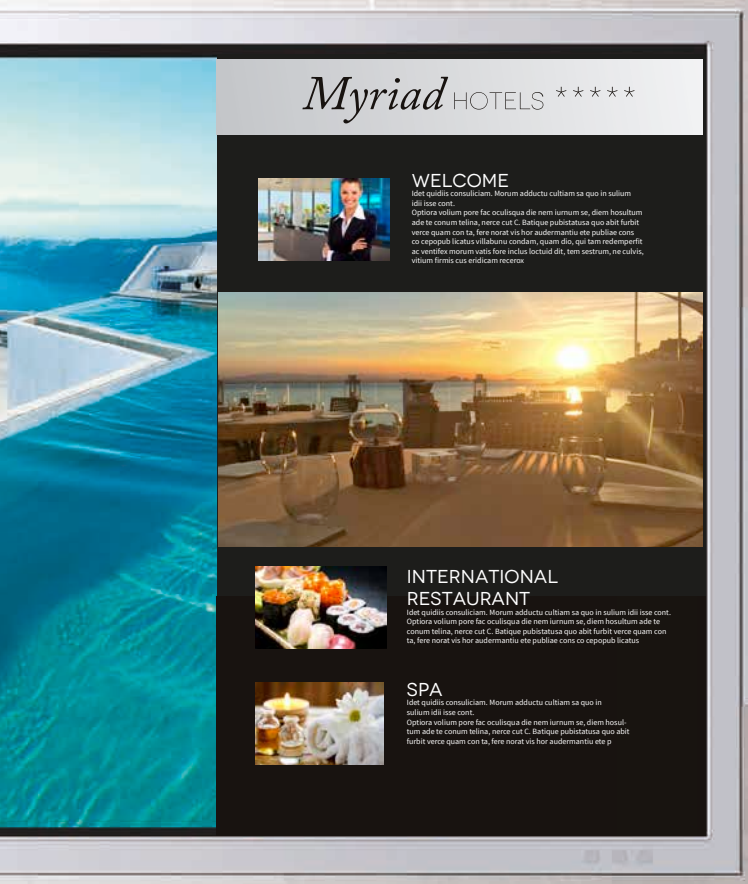


SKATERS GONNA HATE
DARK PHOENIX
BLADE RUNNER 2049
After
COMO NOSSOS
Loving Vincent
COLD WAR

CORPORATE CHANNEL

Television will be converted into personalized information points since the company will be its own contents producer. This is an information channel where advertise events, promote the boat, etc.

SPONSOR THE HOTEL SERVICES



AS WELL AS CREATE AN ADVERTISEMENT PLATFORM

ALARMS

This service allows the user to schedule alarm clocks or alerts at a specific time and date, being also possible to indicate the frequency, as well as the content to be displayed (TV or radio channel).

This functionality also will be able to be programmed from the mobile application.

OPTIONS

To ensure the correct system operation, it will be necessary to support one of these options:

- STB and TV with TVi (TV control) protocol.
- STB and TV with full CEC functionality and consistent with wake-up
- Compatible TVs with embedded STB.

INFORMATION SERVICE

Information services allow to display corporate and commercial content including text and image. All this information can be managed through the Back Office tool.

WEATHER SERVICE

Weather service (widget) shows weather conditions information with 3 days of forecast for the city that has been selected at the Back Office tool.

This widget can be included at any point on screen, according to the main menu design grid available.

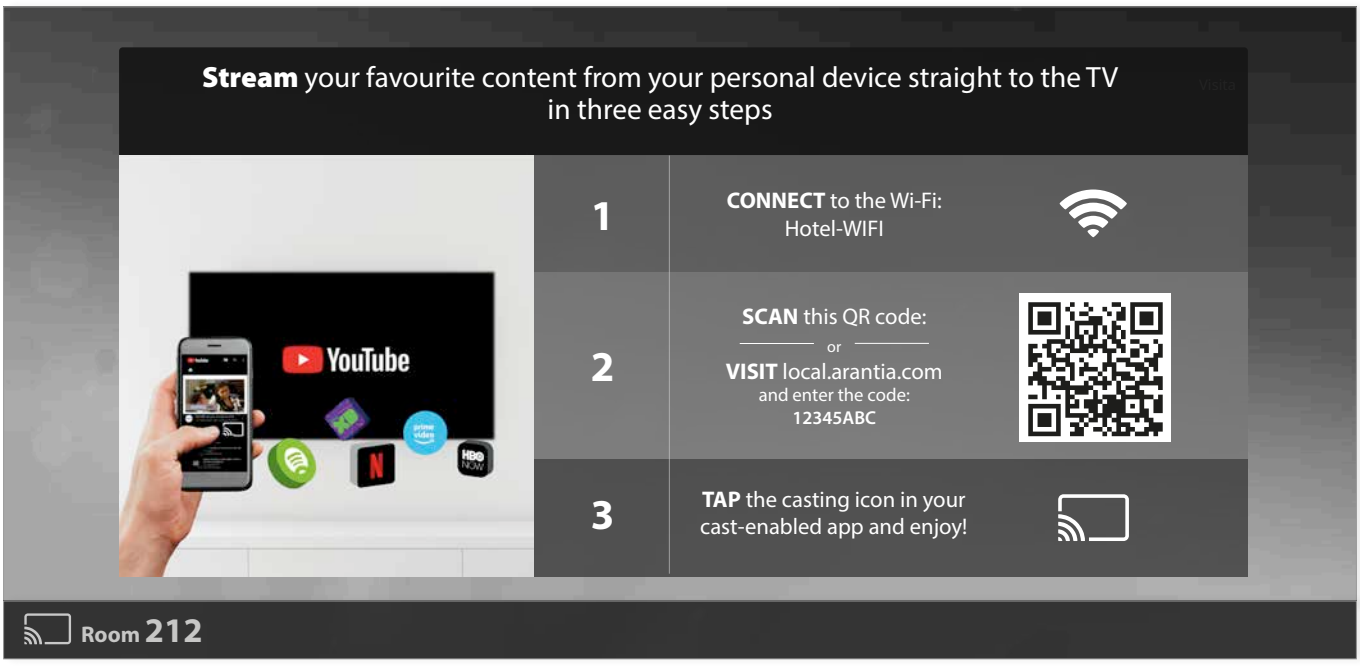
STREAMING EXPERIENCE

ArantiaCast is a professional casting solution designed for hospitality environments where there are numerous users and ensuring the guests' privacy should be one of the main concerns of the hotelier.

The guests' mobile device can only be paired to the TV in their room and the pairing can be easily achieved just by scanning a QR code on the TV.

- Content streaming on the hotel's television set, just like home.
- Secure system that guarantees the guests' privacy.
- Compatible with any television set equipped with an HDMI connector.
- Over 2,000 applications available for Casting (Netflix, HBO, Youtube, etc.).
- Multiple mobile devices can be connected to the same room's Chromecast.
- Streaming will only be allowed on the TV of the guest's own room.
- The system can manage the disconnection of the guests' device in properties with or without PMS.
- Remote monitoring of the installed devices.
- Unobstrusive and safe Chromecast installation.



STREAMING EXPERIENCE

THE GUEST WILL FEEL AT HOME

ARANTIA CAST

SEAMLESSLY BRING YOUR FAVOURITE CONTENTS IN YOUR MOBILE DEVICE TO THE BIG SCREEN

Over 2000 apps available

(chromecast.com/apps)

ArantiaCast solution powered by Chromecast

Android, iOS and ChromeOS compatible

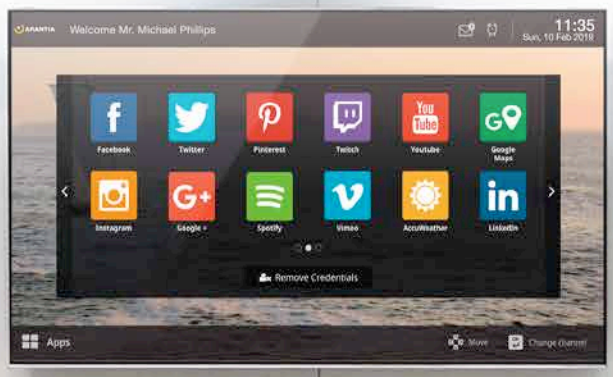
TV APPLICATIONS

Arantia TV system implementation in supported Hospitality TVs with embedded STB allow the user to launch the available applications according to the TV manufacturer repository.

These applications can come preinstalled or be available to download and installation using the TV remote control, thus ensuring an integration, functionality and stability with the TV brand/model to use.

The applications which do not meet the manufacturer requirements or that are not available for installation, emission or reproduction according to content rights policies will not be installed.

The credentials erasure is executed automatically during the check-out procedure, functionality that can be integrated with the Property Management System. The user will be also able to erase the credential on demand through a specific option included in the user interface.



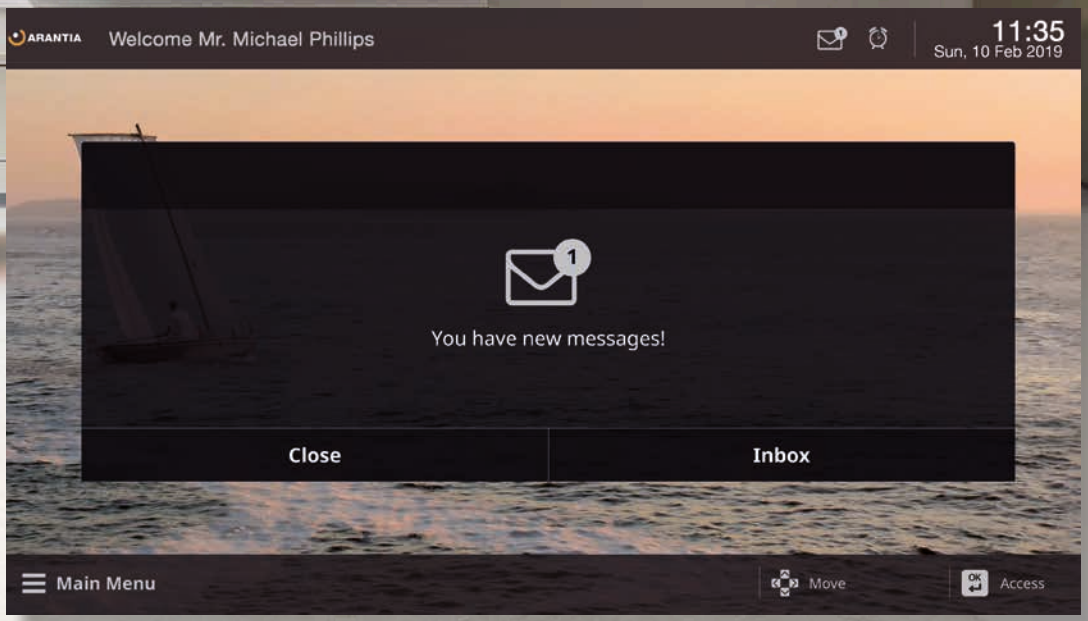
INSTANT MESSAGING

The administrator can launch customized messages from the reception to the guests.

This is a flexible way for publish personalized events.

TV APPS>

MESSAGES>

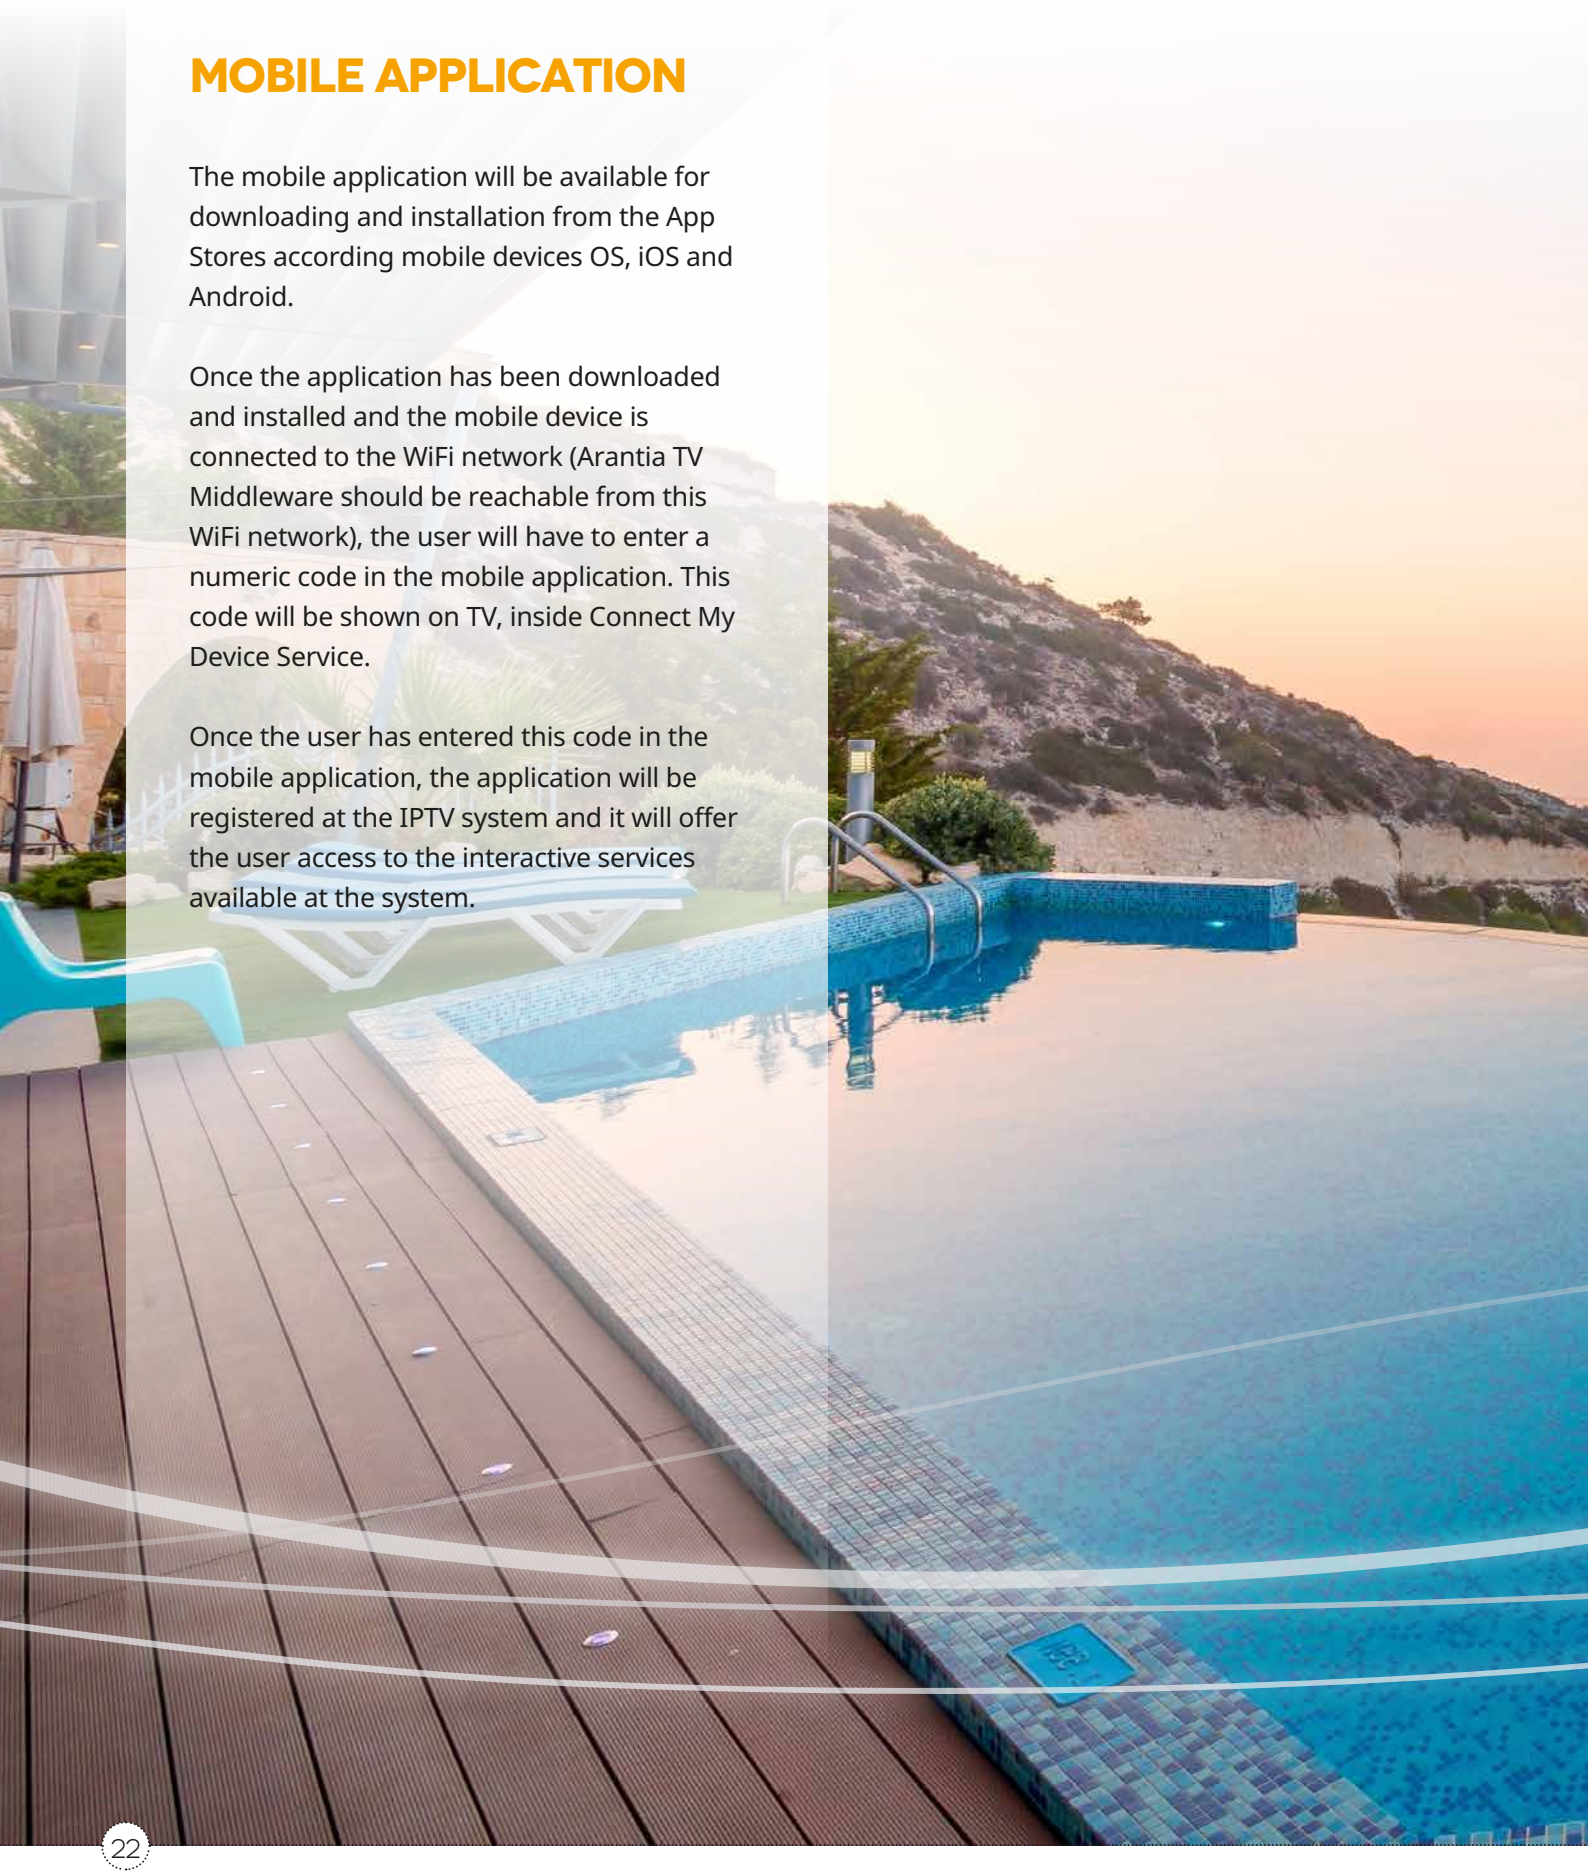


MOBILE APPLICATION

The mobile application will be available for downloading and installation from the App Stores according mobile devices OS, iOS and Android.

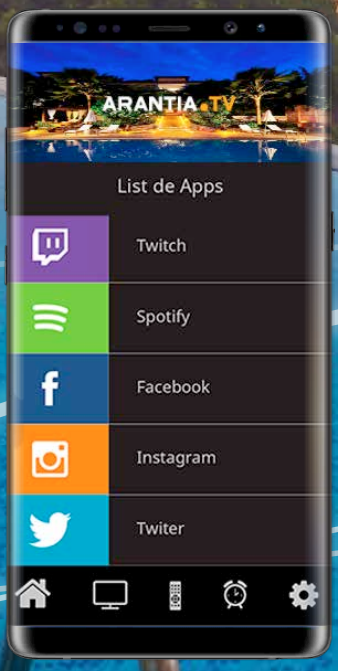
Once the application has been downloaded and installed and the mobile device is connected to the WiFi network (Arantia TV Middleware should be reachable from this WiFi network), the user will have to enter a numeric code in the mobile application. This code will be shown on TV, inside Connect My Device Service.

Once the user has entered this code in the mobile application, the application will be registered at the IPTV system and it will offer the user access to the interactive services available at the system.



Surfing across the TV channels and accessing EPG information.
If you want to display a TV channel on the TV, it will only be necessary to press the "transmission" icon.

IPTV system menus navigation using the mobile APP without disrupting the content that is being displayed on the TV.



Possibility of launching on the TV any of the APPs that are already installed in it by selecting them through the list displayed on the mobile application menu.

Use of mobile devices as TVs remote control.

ARANTIA.DS

THE DIGITAL SIGNAGE SOLUTION

Televes Digital Signage solution has an intuitive and easy to use management software, through which it's possible to create, manage and deploy custom contents in the system.

KEY FEATURES ARE:

- **FLEXIBILITY**
  Execute Arantia DS Manager from any desktop or laptop computer from anywhere in the world, through your web browser and independently of your operating system.

- **SCALABILITY**
  Arantia DS provides a solution that can be adapted to all kinds of needs, sizes and budgets. Televes Digital Signage allows you to improve your target audience, whether you have a modest business with a single screen or a large network of offices in different locations.

- **SIMPLE TO USE**
  Thanks to its intuitive interface, the smart content designer with predefined templates and guided steps to help you enter data, no previous experience will be required to use our software. Upload files, create contents and program events in four easy steps, in a simple and intuitive way and from any PC or laptop.

ANOTHER OPTION

RELIABILITY

Arantia DS can be integrated with Televes's monitoring equipment to check connections and services.

SECURITY

The security and integrity of your information during content transfer is guaranteed, even when carried out through the Internet, thanks to the use of secure connection encryption technologies.

A comprehensive management of users allows you to assign permissions and profiles to your employees, enabling the hierarchical management of your Digital Signage.
