

Televes to present cutting edge distribution solutions at the Light + Building Trade Fair, in Frankfurt

Santiago de Compostela, 12nd Aprile 2012. Televes will participate in the [Light+Building](#) trade fair that will be held in Frankfurt (Germany) from 15 to 20 April. This event will bring together over 2000 companies from all over the world, who will share their solutions for technology and lighting services for buildings.

As a European leader in the design and manufacture of telecommunications equipment and solutions, Televes will present an extensive catalogue of products, where the **T.OX head-ends** will figure prominently, and which on this occasion will be presented in practical cases using different transmodulators for COFDM, QPSK and 8PSK to distribute in PAL, QAM256 and COFDM, to show the versatility of the equipment, which is also the most efficient in terms of energy consumption per service delivered.

The Televes stand will also exhibit the new range of **Minikom amplifier units**, both Class 3 and Class 4, which are the perfect solution for the distribution of multimedia services in homes as well as in small and medium-sized businesses.

The company will present the complete **Multrix multiswitch** range, as well as the energy efficient **ECO multiswitches**, which obtain their power as well as the LNB power through the satellite receiver.

T.OX Head-end.
