

ANGACOM sets the stage for Televes in the data network integration market

Santiago de Compostela, 17th June de 2015. Televes makes a very positive assessment of its participation in [ANGACOM](#) 2015, held between 9 and 11 June in Cologne (Germany). The fair had a record turnout, with exhibitors and visitors from 74 countries, which gives an idea of the true international character of this event, a must for the Broadband, Cable and Satellite sectors.

It was particularly satisfying to witness the interest generated by the **FiberData** solutions for hybrid **RfoG**, **GPON** and **CoaxData** networks, developed to meet the needs of cable operators looking to extend fiber optic networks to the end users. In view of the response, the company obtains an excellent competitive position to address the data networking integration market, which has great prospects of development around the world.

Great compliments were also received with the new **NevoSwitch** range, whose performance and quality could be verified live. Fully developed and manufactured by Televes in its own facilities, NevoSwitch is comprised of multiswitches, taps, splitters and line amplifiers for IRS installations for either star or cascade topology. *Quad compatible* references available, they can be configured as stand alone, or powered by a receiver. Thanks to its ECO mode, the consumption decreases as the number of users is reduced.

The new encoders for the **T.0X** distribution head-ends, **IPTV** solutions for the **Hospitality** sectors and the full range of **H series meters**, first to incorporate digital processing in portable formats, were also protagonists featured in the exhibition of Televes in ANGACOM.

"The fair has been quite stressful for our team, but our satisfaction with the results could not be greater, thanks to the high number and quality of visitors we have received," said **Matthias Dienst**, Country Manager of Televes Germany. "This year **we have witnessed how Televes is now well established as one of the the big brands in the German market**, and that the segment of electrical equipment distribution considers us a key partner, committed to the development of their business," said Dienst.

About Televes

Televes is a leading global company focusing on the design, development and manufacture of systems and products associated with telecommunications services for the home, and specialising in reception and broadcast of television signals. The company's headquarters are located in Santiago de Compostela (Spain), where the company was founded in 1958. At present, Televes is the head of a Corporation formed by 21 subsidiaries (technological, industrial or commercial), near 700 employees and 53 invention patents.

Televes has ten international subsidiaries in Portugal, France, UK, Italy, Germany, Poland, Russia, UAE, China and USA, and distributes its products to more than one hundred countries on five continents through an extensive network of distributors. Throughout its 55 years of experience, Televes has launched more than 1,500 different products, an achievement that is understood from the company's real passion for manufacturing. The company produces at its own facilities to ensure the highest quality. To achieve this, it has been a pioneer in the implementation of automated robotised lines and has its own testing and quality control laboratories. Therefore, the brand's products proudly display the "European Technology Made in Europe" stamp.
