

Televes presents advanced TV and data networks solutions in CABSAT

Santiago de Compostela, 8th March 2016. One more year, Televes is participating in CABSAT, the main event for the digital industry of the Middle East, Africa and South Asia, to be held at the Dubai World Trade Centre until 10th March.

In this forum the company is focusing on the range of solutions to offer **advanced television** services for hotels and the **Hospitality** sector. Solutions that integrate and adapt to the needs of each client offering content accessible from different platforms: DTT (digital terrestrial television), satellite, cable, IPTV, OTT (Over The Top) or VOD (Video on Demand) and **Digital Signage** services.

Another point of interest in the offer that Televes is presenting in its **booth (C2-10)** is the range of solutions for the deployment and management of **high capacity data networks** through optical fiber (**FibreData**) or coaxial cable (**CoaxData**). These solutions are aimed at small and medium size operators and have a growing demand for their ability to support the so-called **Quadruple Play** service configurations: broadband Internet, television, telephony and wireless services.

TRedess, the firm within the Televes Corporation specialized in the development and manufacturing of low and medium power transmitters for DTT coverage, is also present in CABSAT.

"CABSAT is for us the perfect platform to open new business opportunities and strengthen ties with our customers in a very dynamic region, in which the Televes brand is becoming better known and appreciated each day," said **David Goldar**, managing director of Televes Middle East.

About Televes

Televes is a leading global company focusing on the design, development and manufacture of systems and products associated with telecommunications services for the home, and specialising in reception and distribution of television signals. Headquarters are located in Santiago de Compostela (Spain), where the company was founded in 1958. At present, Televes is the head of a Corporation formed by 21 subsidiaries (technological, industrial and commercial), near 700 employees and 75 invention patents.

Televes has nine international subsidiaries in Portugal, France, UK, Italy, Germany, USA, Poland, Russia, UAE and China, and distributes its products to more than one hundred countries on five continents through an extensive network of distributors. With almost 60 years of experience, Televes has launched more than 1,500 different products, an achievement only possible for a company with a real passion for manufacturing. The company produces at its own facilities to ensure the highest quality and control. To achieve this, it has been a pioneer in the implementation of automated robotized lines and has its own testing and quality control laboratories. Therefore, the brand's products proudly display the "European Technology Made in Europe" stamp.
